2018/1796/P	Debbie Scott	17/05/2018 09:07:17	OBJLETTE R	This is a repeat of the planning application that has already been turned down when the property was recently renovated. The application to place a balcony is out of keeping with the properties in road, would have a significant affect on the privacy of the properties near by and contravenes the planning regulations in the local area. The property has already built this balcony and then following a rejection of retrospective planning had this denied and been forced to put back the original features of this window (without a balcony). For these reasons I object to the planning application.
2018/1796/P	Vania Melo	16/05/2018 09:41:43	OBJ	This plan has already been refused last year as it alters the elevation of the back of the houses in what is a conservation area. The balcony was fit and the Council re-instated the tiled roof.
