2018/2226/T	Shirley Richmond	26/05/2018 22:45:40	SUPC	I support this application but would like to comment on the sumac tree, T23. This tree is currently supporting an ancient and immense growth of ivy which excludes morning light from my property [REDACTED]. The ivy is also causing structural damage to sleepers that act as a retaining wall [REDACTED] above the canal. I do not think the trunk of the sumac should be retained to support the ivy. The ivy needs to be removed as well as the tree.
2018/2226/T	Maeve O'Connor	29/05/2018 14:07:48	COMMENT	My concern with this application applies only to the sumac tree labelled T23 on the map. The roots of this tree appear to be dangerously close to the canal wall. The tree also supports a huge growth of ivy that needs to be removed, together with T23, at the earliest possible opportunity.
2018/2226/T	Shirley Richmond	26/05/2018 22:45:55	SUPC	I support this application but would like to comment on the sumac tree, T23. This tree is currently supporting an ancient and immense growth of ivy which excludes morning light from my property next door. The ivy is also causing structural damage to sleepers that act as a retaining wall on my property above the canal. I do not think the trunk of the sumac should be retained to support the ivy. The ivy needs to be removed as well as the tree.
