2018/2087/P	Paul Allen	01/06/2018 09:25:27	SUPPEMPE R	I support the use of Photo-voltaic panels to produce our own local renewable energy. Especially on a public building which may encourage others to add their own panels. We need more renewable power to address the Paris Climate Change aims and to allow for more electric vehicles to address our local pollution problems.
