1. Site Analysis

37 Fredrick Street is a three-storey terrace property, with a basement and attic, built during the first half of the 19th Century (c.1830). It is Grade II listed and within the Bloomsbury Conservation Area. The front elevation is of painted render/stucco and stock brickwork.

Extracts from 'Bloomsbury Conservation Area Appraisal and Management Strategy' – Adopted 18 April 2011:

Calthorpe Street/Frederick Street.

This sub area is situated on the eastern edge of the Bloomsbury Conservation Area, east of Gray's Inn Road, and abuts the boundary with the London Borough of Islington. It comprises an area of mainly terraced housing built on the Swinton and Calthorpe Estates to the east of Gray's Inn Road, an historic route dating back at least to Medieval times. It is one of the few parts of the Conservation Area that has a noticeable fall from west to east, being on the west side of King's Cross Road which follows the valley of the now culverted River Fleet. The northernmost part around Swinton Street was developed in the late 18th century following the construction of New Road (now Euston Road) and a small suburb to the north of this area around Battle Bridge. The remainder of the area was developed over the period 1820 to 1850 by the builder Thomas Cubitt who had his yard in this area. A notable pattern is the progression of development from west to east and the gradual variation in the detailed treatment of the frontages. In the 1860s the excavation for the new Metropolitan Railway cutting bisected Swinton Street and Acton Street towards their eastern end.

Most of the buildings in this area date from the 1820s to the 1840s, and were designed and built by Thomas and William Cubitt. 19th century development progressed from west to east, although there have been some areas of post-war redevelopment. There is slightly greater use of stucco render in these quieter streets. There is generally a grander, classical approach to the overall composition of elevations, which boast pilasters, pediments and projections, emphasising the design of the terrace as a single composition (particularly evident on Frederick Street). Several terraces in this area have entrance porticos at street level giving greater architectural significance, a feature not seen in the streets to the north.

The property is part of a portfolio of properties acquired by Community Housing Association in the 1970's in Frederick Street, Ampton Place and Ampton Street. 37 Frederick Street was converted into two self-contained maisonettes during the early/mid 1980s. Planning consent and Listed Building consent have already been granted in respect of work to the lower maisonette including the installation of an integrated reception system (IRS) to the main roof.

2. Development Objectives

One Housing Group is carrying out a series of repairs and improvements throughout the majority of their properties in the immediate vicinity (i.e. Frederick Street, Ampton

Street and Ampton Place). Generally, the works consist of the essential renewal of services (mechanical and electrical installations), kitchen fitting and bathrooms together with all other necessary repairs. Targeted improvements to the internal layouts of the maisonettes, flats and bedsits may also be proposed on a property-by-property, unit-by-unit basis. Improvements to the fire resistance of plasterboarded partitions and ceilings are also proposed together with the installation of a fire alarm system to safeguard the communal circulation areas.

The upper maisonette at 37 Frederick Street is one of several units planned for upgrading in the final eighth phase.

3. Design Solution and impact on heritage assets

The layout of the maisonette is to be retained with only a handful of minor alterations (kitchen layout alterations, new boiler, etc.), which are all shown on the submitted drawings.

Planning consent and Listed Building consent are therefore sought for these works together with the following:

- Selectaglaze secondary glazing (locations identified on drawings)
- Formation of small store cupboard at second floor level beneath the attic staircase flight
- Replacement of non-original attic dormer window to match existing but with double glazing
- Renewal of rooflight to front roof slope with Velux conservation rooflight

The proposed alterations are minor and discreet – they will not be noticeable from the street and will therefore have no adverse impact on the listed building. Doubleglazing is being proposed only to new joinery that is replacing defective non-original joinery and in a discreet location. The changes do not harm the building nor do they affect any original features, they are reversible and will positively contribute to the stock of housing in the area by improving the quality and standard of accommodation available.

4. Access

There are no proposed changes affecting the access arrangements to the property.

5. Affect on neighbours

The proposals will have no affect on neighbours.

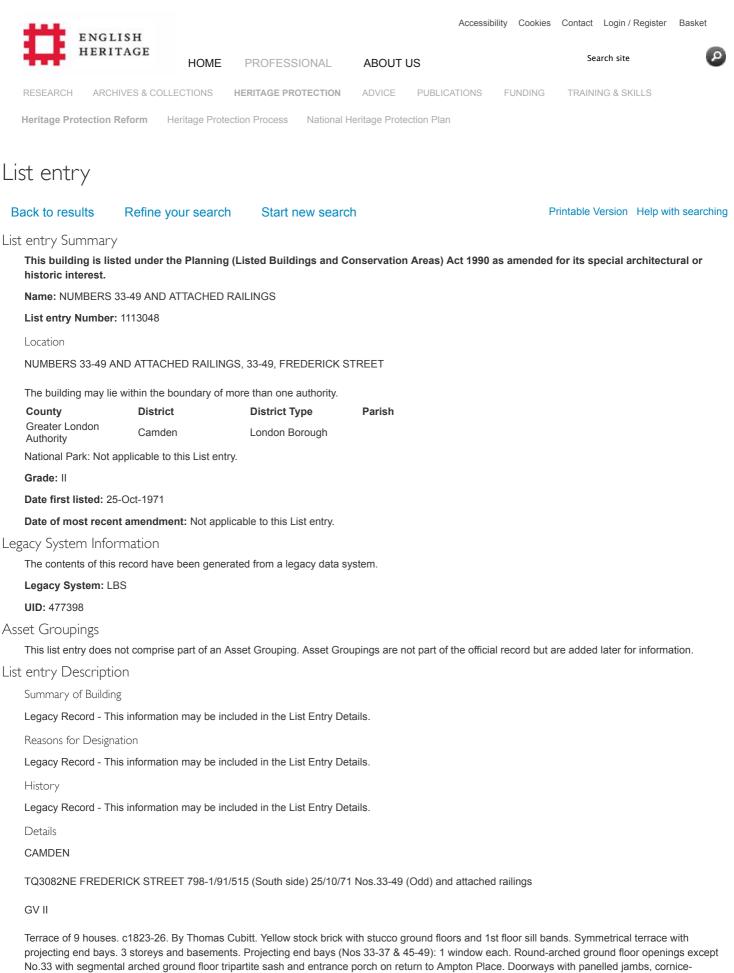

6. Landscaping

The proposals do not include any changes to landscaping.

7. Appendix

English Heritage List Entry Summary for 33-49 Frederick Street.

heads, fanlights and panelled doors. Sashes with margin lights. On each house, rising through the 1st and 2nd floors, pilasters with enriched capitals,
