2018/2898/T	Ms E Breeze	23/06/2018 18:10:45	JUST	Shouldn't it be checked whether honey fungus? If it is then the tree will probably die anyway and infect other plants but if not then perhaps should be preserved. So many trees being cut down in this area and they add so much to the pleasure of the environment as well as helping with air pollution. Is it necessary to poison? I am in favour of avoiding toxic chemicals if at all possible.
