2018/2872/T	P. Ripley	01/07/2018 22:17:56	OBJ	I strongly object to the removal of this very old and healthy tree for several reasons, first these trees are in the conservation area and help with the reduction of pollution in this area, they create privacy for all of the surrounding buildings, it helps the wildlife and is a source of life. They are also a sound barrier between the surrounding buildings helping with noise reduction, as my balcony is only a few meters from the next building the cutting off the tree would impact my view and I will be exposed to others overlooking my balcony.
