Overview

Vicon's V9500D HD IP Turret Cameras are designed for demanding security installations. There are 1080P (2 MP) and 4 MP models with a motorized varifocal autoiris lens. The camera includes IR illuminators.

The V9500D Series provides triple streaming and supports H.264/H.265 compression technology, significantly reducing file sizes and conserving valuable network bandwidth. The camera provides Smart Encoding, which monitors the amount of motion in a scene, resulting in overall savings in storage requirements and bandwidth.

The camera is designed for easy installation. Power over Ethernet (IEEE 802.3af) eliminates the need for power cables, providing a cost-effective method of installation. The camera

also accepts 12 VDC. The V9500D can be mounted on a wall or ceiling; its unique design provides easy adjustment for any angle of view.

In order to adapt to constantly changing outdoor lighting conditions, the V9500D series features an autoiris lens to adjust the lens opening to the changing light levels. The true day/night progressive scan camera also includes a removable IR cut filter for superior image quality in all lighting conditions. Wide Dynamic Range further improves picture quality by balancing the high contrast between bright and dark areas in scenes, providing one clear image.
