2018/2681/T	Simon Morris	05/07/2018 16:25:36	OBJ	<p>This is a beautiful, mature trees which is important to the look of the area - including from Elsworthy Terrace. Furthermore, it is an important lung in our dangerously polluted city.</p> <p>The tree is right on the property's boundary and has clearly been neglected. I simply do not understand why the applicant did not request reasonable pruning rather than an act of environmental vandalism in a polluted conservation area.</p> <p>Correctly looked after, trees will outlive us all and while children's lungs are being stunted and our air regularly breaches standards, tree felling should only be allowed as a last resort.</p> <p>In this case, documents seem to suggest the problem is neglect of the tree which can easily be corrected. I strongly urge officers to reject this unnecessary &amp; incompetent application.</p>
