2018/2342/P	Neil Chappell	10/07/2018 18:47:46	OBJ	<p>The proposed development will cause unnecessary risk being put on a landmark building, by disturbing the existing foundations. The very make up of ground conditions and surface water in this area is very volatile hence why Camden Council has a basement policy in the first place. The conservation area shouldn't be put at risk for trivial unnecessary works. The noise from air conditioning units is also something we do not want in the area and would be very intrusive for all.</p> <p>The effect of this work and the disruption it will cause to the immediate neighbours should be considered and neighbours 'quiet enjoyment' should be protected.</p>
