2018/2445/P	Neil Chappell	10/07/2018 18:32:15	OBJ	<p>The proposed development will involve heavy breaking out of the existing ground floor slab, digging down and risking damage to neighbours' buildings.</p> <p>The effect of this work and the disruption it will cause to the immediate neighbours will be horrendous.</p> <p>The already precarious ground conditions in the area will be severely disturbed most probably leading to further serious damage to surrounding buildings in oncoming years, if allowed to go ahead.</p>
