2018/0846/P	Debbie Radcliffe for Bloomsbury CAAC	11/07/2018 22:19:58	OBJ	Bloomsbury CAAC objects to the infilling of this courtyard in Covent Garden by the proposed design of a glass pitched roof and steel structure. It is harmful to the character of the conservation area – courtyards were designed to be open spaces within dense areas of habitation. The proposal will also impact on services as there will be no obvious means of access for maintenance etc. The creation of an enclosure will result in lack of fresh air that will require air conditioning units which again impact negatively on the conservation area.
