71 Goldhurst Terrace, NW6 2018/1610/P
Objection to basement flat

11 July 2018

[REDACTED]

Dear Mr. Lester

I am very concerned about the proposed basement development at the above.

Here are my reasons:

1. The air pollution, noise, dust this would cause, and the fact that my amenity of being able to enjoy my flat would be taken away.
2. We will lose valuable parking spaces and traffic will be disrupted down Goldhurst Terrace
3. All previous basement conversions have been done by house owners; this flat is share of freehold, and the other freehold sharers are against this conversion.
4. The conversion would probably increase the sound from the underground. I could never hear it and now since the conversions at no 58 and 66 It wakes me up at 5.30 am.

I believe we have a right to enjoy our properties and do not understand how you can consider ruining our road and possibly endangering the building and the land under our road.

Yours sincerely
