2018/2465/T	Eileen Harrison	12/07/2018 21:32:02	OBJ	<p>The trees provide beauty and wonderful shade in summer (for residents and walkers) .</p> <p>I understand no evidence has been submitted of subsidence attributed to the single stem lime tree (TPO C1186) in question, and should like this tree to be saved. Can not one stem of the multistem tree (TPO C763) be saved/ Could not substantial pruning make a difference?</p> <p>IF the multi stem tree has to go, then I suggest Camden insist that the roots are drilled out and another tree planted. I suggest this is done for any tree that Camden insist has to be felled. The single lime tree may also contribute to shade for 13 Belsize Grove.</p>
