2018/2442P	Bill Anderson	13/07/2018 12:09:41	OBJ	<p>We are [REDACTED] higher up the hill on the same (north) side of the road.</p> <p>We object to this application for two reasons.</p> <ol style="list-style-type: none"><li>1. A row of Victorian terraced houses built on a hill, on clay, with an underground river at the bottom and an underground stream running down the hill is a fragile ecosystem. Many houses have already had to deal with subsidence and there is a genuine fear that both large scale excavation and the insertion of rigid structures can have an impact far beyond the immediate environs of this work.</li><li>2. There are currently no excavated basements in Spencer Rise and the approval of this application will set a precedent for similar future applications, further endangering the ecosystem described above.</li></ol>
