

GRABEX
windows

Manufacturer of high quality windows, doors and conservatories

Timber Sash Windows

Timeless sophistication. Fine historical design meets high-end craftsmanship.

Our sash windows are manufactured to achieve superior insulation and high performance without compromising their classic appearance and quality.

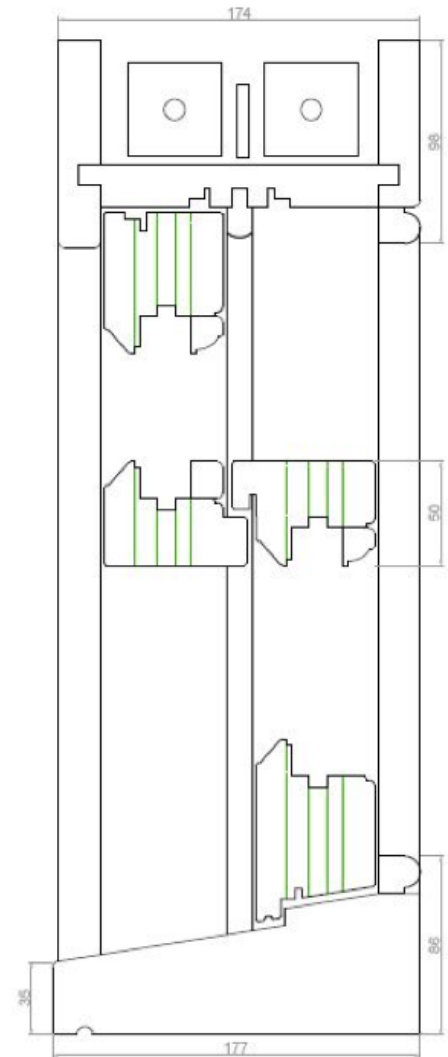

GRABEX
windows

Manufacturer of high quality windows, doors and conservatories

Main Features:

- Engineered hardwood, softwood, oak or long-life accoya wood
- Multi-layer timber sections
- Fully drained and vented
- Dummy sashes to all fixed areas
- Internally beaded
- Variety of high quality hardware
- Bespoke designs matching the character of any property
- Full range of colours and finishes
- Factory glazed, argon gas-filled sealed units with Planitherm Total Plus soft coat energy saving glass and warm edge spacer bars (1.2W/m²K U-value as our standard)
- Factory finished with high quality preservative, primer and two coats of micro-porous paint
- Manufactured using an environmentally friendly approach with materials only sourced from suppliers who practice sustainable development

The traditional box sash window has been a part of British architecture since the seventeenth century. Amazingly, the design remains almost unchanged. Traditional sash windows operate using a mechanism that consists of cords and pulleys counterbalanced with weights.

Quadruple draught strips prevent rattles. High insulation glazing units drastically reduce heat loss and down-draughts. Multi-layered timber and careful attention to detail help minimise swelling and warping that causes jamming on windows of lesser quality during wet weather. For narrower frame profiles, spring balanced sliding sash windows are also available.
