2018/3131/P	John Myers	29/07/2018 18:55:29	OBJNOT	<p>This is another loss of open space, not foreseen in the HS2 Environmental Statement, in one of the few locations where more trees, greening and perhaps seating could have been added along Drummond Street to mitigate the loss of the green spaces and mature trees to HS2, in an area that is already profoundly deprived of greenery and open spaces according to planning criteria, not to mention illegal levels of air pollution which greenery can help to alleviate.</p> <p>We had intended to place trees in planters or other greenery at this location before we learned of this application.</p> <p>Given the rapid growth of dockless bikes and other means of transport, it is not even clear for how long the proposed new stand will be viable. It is premature to permanently grab a large additional swathe of Drummond Street.</p> <p>If permission is not refused it should be limited to a maximum of ten years. That will give HS2 plenty of time to incorporate a replacement cycle stand within the new HS2 station and other land that HS2 has occupied, and allow this proposed site to be used for more greening.</p>
2018/3131/P	L Chandler	29/07/2018 19:15:37	COMMENT	<p>It is a great shame that this site is not being used for greening in view of the loss of parks and trees in the surrounding area. Can trees / the greening of the wall behind not be incorporated too? If the application is approved it should be time limited (5 or 10 years only) so that it does not become a permanent fixture in the street as it is an inappropriate location for the long term.</p>
2018/3131/P	Dorothea Hackman	29/07/2018 20:21:51	OBJEMAIL	<p>Surely a better site can be identified, that does not result in further loss of amenity for residents. While appreciating that NWR wants to replace cycle storage for commuters, this shouldn't be done at the opportunity cost of re-providing a small amount of the lost green space in the immediate area. It is a serious neglect of the well-being of residents in Camden to fail to provide the balm and air quality benefits of greenery and trees.</p> <p>If despite this valid objection you go ahead and permit this space to be lost, please ensure it is done for the shortest possible time and is rapidly restored and improved. I would suggest an absolute maximum of ten years, but note this would constitute most of the childhood for a generation, and you should seek to mitigate this avoidable impact in the parish of St Pancras.</p> <p>Camden Civic Society </p>
