2018/1153/P	Sanya Polescuk for Belsize Residents Association	05/08/2018 14:07:21	OBJ	<p>The proposal is objectionable on the following grounds:</p> <p>1 the length of the main extension seems excessive and likely to cause loss of light to the immediately adjacent neighbours. In order to determine if this be the case, Right to Light study should be submitted, in addition to the illustration of the wider context of rear extensions. This is necessary in order prevent a compounded negative effect of this extension on the neighbours</p> <p>2 the shallow, stepped pitches of the proposed Roos are incongruous with the steep pitched roofs of the host building. In addition, the taller of the roofs Coutts insensitively into the original brick banding of the host building (the single story bay window resolves this edesign feature much better)</p>
