2018/3408/P	Yithat Amstein	06/08/2018 15:45:51	OBJEMAIL	These extensions are really damaging The quality of life for the tenants of the Mews. Can someone please come in person and take a look at how narrow and overcrowded the area is? Its a fire hazard already and its beginning to look like a slum rather than a neighbourhood. This continuous development is just going to lower the value and the return on investment for the council, not to mention the everyday annoyance. Please come see before you approve more development and please come to Rose Joan Mews So I can show you another development you approved that looks straight into our home.
2018/3408/P	Jacky Schloss	06/08/2018 13:46:21	OBJ	As a long term resident of the mews I would like to bring to your attention that the access road is a well used thoroughfare for the residents that live in the original homes (3-12) built over 10 years ago.We have drive in/out access to an underground car park. P This area is already becoming more messy and hazardous with inconsiderate tenants moving in with complete disregard for the area. Another bedroom space will just add another person to an already overcrowded area.
2018/3408/P	Y TEN	06/08/2018 12:55:33	APP	As usual, no residents here have been notified on this planning application! There has been no sign of any notice in Rose Joan Mews. The assessment provided and assessed by the planing permission team is completely wrong as we all need 24hr car access. There are 10 houses here in our development and there are additional flats/houses further towards the end of the mews. There is also a next door neighbour who needs constant access for hospital emergencies. This planning application lacks any provisions to allow 24hr car access and lacks any provision to repair the road - this and recent developers who were granted planning permission have already caused substantial damage to the road and also to our properties. It is a real shame the council team looking to grant permission to this application has not take into account residents who are part of the actual community. These developments are purely for investment/rental purpose with the community constantly cleaning after their rubbish (including furniture, mattress etc.). I am strongly objecting to this application unless satisfactory measures are presented and agreed.
