2018/3408/P	Erdem iltanir	13/08/2018 22:44:48	COMMENT	Hi

[REDACTED] 1 rose Joan Mews is very close to my property [REDACTED]. The construction in this property will cause significant impact to my property especially this property does not have any parking lot, thus increase of the sizes of this property only decreases the quality of the tenants since it will be subleased cheap to multiple people. Rose Joan Mews is a one car width narrow road, the population increase any construction just decreases the quality of the street. All these extensions are done without following any pattern, any increase of height in these properties will decrease the amount of light goes in to my property. Several of these buildings are built by property owner Mehdi who employs nonEU migrants not clear even they have employment rights, insurance, etc. They work on the weekend and block the road. Before approving this I invite you to rose Joan Mews street and take a look at the condition of new builds, 20 rose Joan Mews is so close it had to close their windows with wire. The one next to it has a different height than all the rest and not sure if the building is up to standards since almost all house was manually built by one Asian guy who doesn't speak English. All these new builds are painted white but they already look grey black because of the water dripping from their flat roofs to sides and cheap quality material.

Any extension in this street is just decreasing the value of my property, thus it should not be approved
