Further to my last email, I can advise that I have now visited the site from the churchyard and neighbouring garden. I confirm that the PV panels will have no impact on the character of the surroundings and conservation area nor on the external appearance of the listed building due to the extensive tree cover and very limited visibility of the affected parts of the roof from the public or private realm.

I am now awaiting comments from my conservation officer regarding detailed aspects of the proposal in terms of impact on historic fabric. However she has asked me to advise you that you are encouraged to seek advice at an early stage from Historic England on this scheme. Although we may consider the scheme acceptable in principle, it will require planning permission as well as of course a faculty from the Diocese and we will be formally consulting HE at that stage, so it would be beneficial to ensure that they will not be objecting later on in the process.

Can I also enquire what public benefits would accrue from this proposal, as you do not explain the purpose behind the scheme and we are required by law to weigh up any harm arising from a proposal for a heritage asset against any public benefit from it. I assume in this case that it is to save energy for the parish church itself?

thanks
