Comment on planning applications:  
2018/1604/P and 2018/1520/P

The proposed change of roof designs for Building 2, building 5 and Leeder House is unacceptable for the neighbours. The height of Building 5 and Leeder House will be raised significantly due to the proposed additions, reducing direct sunlight into our garden. Installing an air vent on the roof is also an intrusion as we will not be able to enjoy our garden because of the resultant noise. In addition, the repositioning of the proposed solar panels will cause glare since they will now be facing our property, which will also look unappealing. I strongly believe that applications 2018/1604/P and 2018/1520/P fail to take into consideration the impact on surrounding residents, which the project owners have constantly failed to do since day one. We have already been suffering from air and noise pollution due to the construction, which has caused inconvenience for our daily lives since it started. Not to mention that the construction has already massively overrun with no apparent end in sight.

Regards,

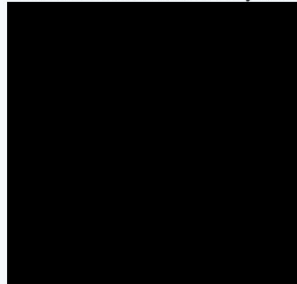

Edwin Gutierrez and Hyun-Yi Kim
