2018/1890/P	Michiko Harris	05/09/2018 00:00:26	COMMNT	I am against having an air condition unit below our living room windows for the fear of our health reasons
2018/1890/P	Amanda	04/09/2018 23:22:14	COMMNT	Not happy at all especially if I will have to put up with constant noise as this will be directly under my living room window.
2018/1890/P	LEBINH TU	04/09/2018 23:27:52	OBJ	<p>I object to the installation of air conditioning equipment as per the revised drawings. The air-conditioning units will result in detrimental noise, visual and air quality impact as the existing resident have living rooms or bedrooms near the planned air-conditioning units. The installation of Air-conditioning units contravenes:</p> <ol style="list-style-type: none"> 1) Camden Local Development Plan 2017 Item 6.99: "Air conditioning will only be permitted where it is demonstrated that there is a clear need for it after all other measures have been considered" - Since there have been 24 flats in the building which have not required air conditioning for the last 40 years, this clearly demonstrates no such need is required. 2) Camden Local Development Plan 2017 Item 6.92 " Planning permission will not be granted in instances where there will be a significant adverse impact on external amenity areas including gardens..." The air-conditioning units will result in a detrimental aspect for users of the adjacent park area / green space. 3) Camden Local Development Plan Item 6.87: "There is a proliferation of fixed machinery, such as air conditioning units in Camden's centres which cumulatively can have a harmful impact." 4) The background noise levels (without the A/C units installed) already exceeds the "Adverse" levels as stated in Noise Policy Statement for England Item 2.20 and Camden Local Plan Appendix 3; as measured by the noise meters in the Accoustic Study. Therefore the addition of air-conditioning units will cause adverse affects to residents' wellbeing. 5) Camden Local Development Plan Item 6.4: "Impact on outlook" - currently the residents have outlook onto the park, which will be negatively affected by the airconditioning units.
