Design and Access

The existing property is a five storey terraced building located in Harrington Square. There are ten self-contained studios within the upper part of the building. The Basement flat has its own entrance from the external stairs from the pavement via the lightwell on Harrington Square. The other ten studio flats are accessed via the communal entrance and staircase. The Basement flat and ground floor flat 3 both have access to the rear garden.

The proposed scheme consists of amalgamating flats 3 and 4 to create a more spacious dwelling. The existing units are very cramped and this proposal will enhance the quality of life for the occupants. The existing exteriors will not be altered.

The proposed works would be to remove the kitchen and shower facilities from the upper studio (Flat 4), so that it will be an open plan room as it was originally built and install a staircase to combine the two units so that the upper level will be used only as a bedroom, as part of the lower flat. This proposed flat will have access to the rear garden.

This application is submitted in order to comply with the Prohibition Order which was served by the Health and Safety Department of Camden Council. This Order required the enlargement of the units as their area size currently is deemed hazardous. The only way this can be achieved is through amalgamating both units.
