Subject: objection to tree reduction 2018/3358/T

THURLOW ROAD NEIGHBOURHOOD ASSOC.

We object to yet more tree reduction by St. Anthony's School .

Their record of tree care is an environmental disgrace . They have removed ALL trees from their large front "garden" and hard surfaced EVERYTHING from wall to wall but for the mature hedge along the roadside . This is totally unnecessary , very environmentally unfriendly (including detrimental to air quality for the pupils) and sets an appalling example to their young pupils . All rain is wasted as run-off into the road gutters , no air is filtered .

Before granting yet more severe pruning in their back "garden" (in fact totally hard surfaced but for these tortured trees which struggle for water) they should be required to replace with a young tree the magnificent veteran tree they recently felled in their front yard to the detriment of all who pass on Fitzjohn's Ave. including their pupils .

Their Head should be ashamed of him/her self for setting such an appallingly lazy , backward example of environmental unfriendliness to their pupils .

Faithfully ,
A. Parish
PP. TRNA
