

## Products

### Panther Box (AC Treatment)

The NSL Panther Box is an off-the-shelf acoustic treatment for single and dual fan AC units capable of noise reductions of up to 20dB. The product is provided with removable panels on all sides, attenuated intake/discharge apertures and an internal dividing plenum. The units can be stacked to reduce the overall footprint of a plant installation.

Consultants and Contractors in Acoustics, Noise, and Vibration Control.

Operating nationwide with our manufacturing base and back of house support at:

Unit 6, IDL Business Centre, Station Road West, Ash Vale, Aldershot GU12 5RT
