

PROPOSED ELEVATION 6
1:200 @A3

The architectural elevation drawing, titled 'PROPOSED ELEVATION 6' at a scale of 1:200, depicts a modern building facade. The central portion of the building is characterized by three distinct, light-colored horizontal bands that create a stepped, sculptural effect. Above these bands is a glass-enclosed upper level, possibly a rooftop terrace or penthouse, where a person is visible. The building's base features large, dark-framed windows. The surrounding context includes a street with a parked car, several trees of varying sizes, and a background of existing urban structures, notably a large building with a prominent dome. The drawing uses fine lines and shading to represent materials and spatial relationships.
