Wednesday 18th September 2018

Dear Sir,

Thank you for your letter of 31st August concerning the eucalyptus tree at 30 Croftdown Road, 

The tree is over 100ft tall and sways dangerously in the wind. If it falls it will cause serious damage  and may cause physical injury to the occupants. It will smash windows in the basement and in my flat and might even bring down the dividing wall between 30 and 32.

It must come down, because every year it gets significantly taller and is just not suitable for its location. I assume Camden is responsible.

Concerning the plum tree. I have no feelings one way or the other.

Thank you for your attention to this matter.

Yours faithfully,

Dr. Michael Stout
