Hi John,

The design team have considered the Twentieth Century Society's comments and have the following responses:

- **External doors** – we will alter the drawings to change the detail of the new doors.
- **Backing colour of blinds** – They have confirmed that they have requested the backing of the blinds on future phases to be of grey colour. However, this is subject to the altered blinds having the same level of thermal performance.

There are in fact a couple of additional minor changes (for example, less louvres) that have started to come forward as the next detailed stage of design which has been carried out concurrently with the determination of the application. Therefore, as well as making the alterations to the doors above, we will also include these minor alterations in the revised drawings. These will need to supersede the submitted drawings. They are currently being finalised and I hope to get these across to you as soon as possible.

Kind regards,

Ellie Bird
Manager | Deloitte LLP

Subject: RE: IoE Phase 1b Energy and Sustainability Comments

Hi Ellie,

I hope that you had a nice B/H weekend.

Thanks for this. I was out of the office on Friday and so only received today but I have passed on to our sustainability team and asked to confirm that your consultants are on the right track in terms of updating the reporting. I have asked for a quick turn around and so will let you know as soon as I have heard anything further.

On another note, the formal consultation response from 20th C society made it through to us last week. Please see copy attached.
