No. 020 7974 4444 or search for 'environmental health' on the Camden website or seek prior approval under Section 61 of the Act if you anticipate any difficulty in carrying out construction other than within the hours stated above.
- 3 Reasons for granting permission.

The proposed single storey rear extension at lower ground floor level is considered acceptable by virtue of its size, location, design and materials. The extension would be relatively modest, and constructed of matching materials to the host building. Due to its location at lower ground floor level, it would only be visible from the rear windows of neighbouring properties and is considered to have limited impact on the character and appearance of the wider conservation area.

Rear extensions such as that proposed are a common feature along the terrace, and it would be in keeping with the scale of surrounding development. The proposed infill conservatory would sit lower and stepped back from the rear building line of the proposed rear extension. The use of glazing and the

setback would differentiate the lightweight addition from the main bulk of the extension and ensure the overall development was subordinate to the host building.

The proposed rear extensions would sit lower than the existing boundary walls which would prevent any harm to neighbouring amenity in terms of overlooking, loss of daylight, or outlook. The proposal includes the creation of a roof terrace above the extension, adjacent to the boundary with no.42; however, a privacy screen would prevent views between the terrace and the neighbouring windows and garden.

The replacement front door is a minor change that would have limited impact on the character and appearance of the property. The installation of a staircase to access the roof terrace of the proposed extension from the garden is acceptable as is the staircase to access the lower ground floor light well from garden level.

Special attention has been paid to the desirability of preserving or enhancing the character or appearance of the conservation area, under s.72 of the Planning (Listed Buildings and Conservation Areas) Act 1990 as amended by the Enterprise and Regulatory Reform Act [ERR] 2013.

No objections were received prior to the determination of this application. The planning history of the site and surrounding area were taken into account when coming to this decision. As such, the proposed development is in general accordance with policies A1, D1, and D2 of the Camden Local Plan. The proposed development also accords with The London Plan March 2016, and the National Planning Policy Framework 2018.

In dealing with the application, the Council has sought to work with the applicant in a positive and proactive way in accordance with paragraphs 186 and 187 of the National Planning Policy Framework.
