2018/4698/T	Alexander Griffin	03/10/2018 16:05:32	COMMNT	<p>I support this application. The roots from both these trees are severely compromising my brick boundary wall which is lifting and leaning towards the footpath. I have taken advice from my insurers who also support of the trees for these very reasons.</p> <p>I have been advised that repairing the brick wall properly would be impossible without removing the roots associated with the trees.</p> <p>I would be delighted to discuss with the neighbour alternative planting solutions for the future if that were considered helpful.</p>
