8th October 2018

Application for a lawful development of Greater London house LG space to storage

We have previously applied for planning permission (2018/3053/INV) on 28th June to construct additional business / office space in the lower ground floor of Greater London house.

The purpose of this additional space is ancillary to current ASOS use of business / office B1 class, we will not be providing any additional means of access from street level and the full purpose is for ASOS use as storage areas and not independent units

I can also confirm that these changes will not impact the surrounding CPZ nor affect any loss of cycle provision within the building

I met with your officer John Diver on Thursday 4th October and review the space and outlined intended use, John's advice after seeing the space was that I should revoke the planning application and instead send in an application for a lawful development certificate

Therefore, please withdraw the planning application (ref. 2018/3053/P), I have completed the application for a lawful development certificate and was informed the planning fee will be transferred to cover cost

Best regards

Martin Dowsett
