Subject: Future dreams House - application 2018/3956/p

Dear Laura,

I am writing to you with regards to the planning application for FutureDreams House in Camden (reference number 2018/3956/p). I think this would be a fantastic addition to the resources available to patients. My patients at the North Middlesex Hospital have relatively limited options available to them for complementary therapies and psychological support. Patients at UCLH are often younger and have complex needs that are difficult to fully meet within the NHS. In addition, they are often not supported by a good network as they are young professionals in and around central London for work purposes. Having the support that a centre such as the Future Dreams House is therefore invaluable. A central location also makes the centre much more accessible by public transport.

Therefore having such a centre would be likely to reduce the strain on the local service. Please consider the needs of a vulnerable population of women when considering this application.

Dr Fharat Raja
Consultant medical oncologist
North Middlesex hospital
