15a Parliament Hill
 New House

03.03.2016
Proposed
Elevation: SouthEast/b

Minor changes to basement level windows to suit roof drainage & rationalize structural load paths, & to suit fenestration changes generally which relate to the repositioning of the attic floor window.

Vertically sliding sash windows improve passive ventilation of basement floor level. A vertical sliding sash can ventilate during rain, & with sash locks will remain secure when open.
