Back garden next to the boundary wall

1/ Horse chestnut; the tree is growing close to the boundary wall, it has been previously reduced and pollarded at a much earlier date. The tree consists of a numerous leaders and is exhibiting die back in the crown, the trunk has numerous large cavities and there are signs of rot and some weeping at the base where wood had been piled against it. The application is to fell the tree and replace with a suitable species

Yours faithfully

C. HOWARD
