Dear Nora

32 Kylemore Road, London NW6 2PT
Inspections by Chartered Engineer

We have been appointed to carry out checks of the basement construction at 32 Kylemore Road, NW6 2PT and I personally a Chartered Engineer (MICE) will be carrying out site inspections during the works.

Our involvement and responsibilities on the project are as follows:

- Preparation of the design and calculations for the permanent works (complete)
- Attend initial construction stage meeting with Contractor.
- Carry out regular site visits during construction to inspect critical elements of both the permanent and temporary basement construction works in line with the design which has been checked and approved by Building Control.

In addition to the above, as stated in the ground investigation report, a geotechnical engineer will investigate once work commences to confirm the adequacy of the bearing stratum.

Yours sincerely

Adrian Hall CEng MICE
Director
