Objections to Planning Application for 21 St Marks Crescent NW1 7TU

Application number 2018/4365/P

I have objections to the planning application which has been made by 21 St Marks Crescent.

My main concern is that the application for the rear extension is overbuilding in this street. This is because I understand that the application is for both an additional storey and a full width extension across the entire basement.

As someone who lives in a property on the same side of the street, I am also concerned about the impact that this proposed increase in the size and width of the rear extension will have on the rear aspects of the properties and, in particular, how the proposed glazing and roof lighting installation will affect the gardens more generally.

Yours sincerely

Ruth Barr
