2018/4741/P	EMILY SIMON	16/11/2018 13:17:39	INT	The roof which the church would like to alter (and ruin) is a direct view from my house. I think it is a shame to take one of the most beautiful features of our conservation area and blight it with solar panels. I think we should preserve the architectural beauty of the church and leave it intact.
