

Please note my objection below and the documentation provided.

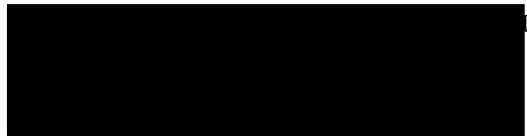

I strongly oppose this application on the following grounds

Safety - The roof terrace at this height is clearly a danger. Earlier this year someone fell from the window of the floor beneath and fractured a vertebra a fall from this height would be fatal. The house is frequently rented on Air BnB and is something of a Party house, Partygoers have been known to stray onto the roof of the property and it would only be a matter of time before someone fell to their death. The low parapet wall is clearly insufficient.

Noise and disturbance – As I have said this is something of a Party house and to provide a roof terrace to this property would only take the party goers outside and make more noise and disturbance.

Overlooking loss of Privacy – Any user of the terrace would have a view directly into our living room.

I will be sending an email and documentation to support this objection.
