| 2018/5607/T | John Tuckaberry | 04/12/2018 15:08:54 | COMMENT | the proposed reduction is excessive. there is no necessity to take the pollarding further back than has been the custom in the past which has been satisfactory. Excessive pollarding runs the risk of creating ground heave under the north end of the block of flats at 16-20 Willes Road with a potential for structural and other damage within the flats. (Lest it be relevant I am the lead trustee for the trust that owns one of the relevant flats [REDACTED]. The other two flats at the north end of the block are 18A and 20A. Nos 16, 18 and 20 are at the south end of the block and unlikely to be affected.) |
