1. INTRODUCTION

- 1.1. 38 statutorily designated heritage assets were identified within the 250-meter radius of the site using information derived from the National Heritage List. This appendix outlines the National List Entries (Historic England) of these heritage assets.
- 1.2. The site remains within the Regent’s Canal Conservation Area (LB Camden, designated in 1974 and extended in 1981, 1983, 1984 and 1985) and Camden Town Conservation Area (LB Camden, first designated in November 1986, extended in 1997) remains directly south of the site. Maps of these conservation areas is included at Figure 2.

1. CHURCH OF ST MICHAEL

IoE Number: 476823

Location: CHURCH OF ST MICHAEL, CAMDEN ROAD (north side), CAMDEN TOWN, CAMDEN, GREATER LONDON

Photographer: David Lovell

Date Photographed: October 2014

Date listed: 10 June 1954

Date of last amendment: 10 June 1954

Grade II*

Church. Nave & aisles 1880-1, chancel 1893-4 by GF Bodley and T Garner. Vestries added 1908. Yellow stock brick with stone dressings; tiled roof. 7-bay aisled nave with clerestory and sanctuary. Decorated Gothic style. North-south orientated. EXTERIOR: entrance on (liturgical) north facade, where tower originally intended. Liturgical west end fronting road with pointed 5-light traceried window above which a belfry in the gable apex; stone and brick bands flanking window and clasping buttresses at angles. Flanking aisle ends with pointed 2-light traceried windows, right hand with ogee doorway and hood-mould. Flying buttresses over aisles, above which a pointed 3-light traceried window to each bay. Projecting vestries at (liturgical) south-east corner. INTERIOR: of stone with continuous, stenciled waggon roof to nave and chancel, vaulted above north chapel, from liturgical east to west broken by stone arches (necessitating the external flying buttresses). 5-bay nave with aisles, 3-bay chancel with shorter north chapel, south chancel aisle filled by organ and passage to vestries. No chancel arch, a manner much preferred by Bodley in his later churches. Chancel retains altar from 1880-1, reredos bears stencil work from 1880-1 and a later (probably 1939) decorative scheme of Christ in Majesty, set on Bodley's favourite marble steps; sedilia on south wall. Brass in chancel floor to Edward Bainbridge Reynolds (1844-1907), founding incumbent, 1908. Parclose screen between chancel and chapel of 1893-4, filled with stone tracery to Bodley's design in 1898. Chapel with Easter sepulchre having gilded canopy and hanging lamp, altar and reredos with marble panels. Organ in south aisle purchased 1932. The church given dado panelling to Bodley's characteristic design in 1893-4; this links the new and old work. Reading desk (undated) and pulpit (1910) on line of chancel steps. Statue of St Michael, 1939. Floor is several steps below the level of Camden Road, with stone flags to aisles. Vestries in more perpendicular style. Clergy vestry panelled with vestment chests. The choir vestry simpler - retained vestry chest at time of listing, but now no longer in situ.

2. WAR MEMORIAL AT THE CHURCH OF ST MICHAEL

IoE Number: 1431860

Location: CHURCH OF ST MICHAEL, CAMDEN ROAD (north side), CAMDEN TOWN, CAMDEN, GREATER LONDON

Photographer: Charles Watson

Date Photographed: December 2016

Date listed: 5 Jan 2016

Grade II

The First World War Memorial at St Michael's Church, Camden Town, of 1920, is listed at Grade II for the following principal reasons: * Historic interest: as an eloquent witness to the tragic impact of world events on the local community, and the sacrifice it made in the conflicts of the C20; * Design: an elegant and well-crafted memorial formed of a crucifix set upon the foliage capital of a tapering shaft and an octagonal pedestal; * Group value: with the Grade II* listed St Michael's Church.

First World War memorial. Erected in 1920 to the design of Clement William Jewitt.

DESCRIPTION: the war memorial stands in the churchyard of St Michael's Church. It is situated immediately south-west of the church and adjacent to Camden Road. The memorial comprises a crucifix set upon the foliage capital of a c.4m high tapering octagonal shaft with a moulded base. The top arm of the cross carries an elaborately carved canopy. At the centre of the shaft is an inscription quoting from the Jesus Prayer: JESU MERCY. The shaft rests upon an octagonal pedestal 0.8m high and two-tiered octagonal base 0.7m high. Encircling the base of the shaft is the inscription: GREATER LOVE HATH NO MAN THAN THIS, THAT A MAN LAY DOWN HIS LIFE FOR HIS FRIENDS. The pedestal carries eight panels upon which are inscribed, along with those on the base, 100 names of the Fallen. The upper tier of the base carries the inscription: '1914 FOR ENGLAND 1919'.

CAMDEN TQ2983NW BAYHAM STREET 798-1/77/60 (East side) 14/05/74 St Martin-in-the-Fields Almshouses, Nos.1-9 (consec) GV II Terraced almshouses. 1817-18. By Henry Hake Seward. For the Parish of St Martin-in-the Fields. Built by J Tomling. Yellow stock brick and slate roofs. Symmetrical 2 storey terrace. Projecting, pedimented centre (No.5) having 3 windows. Flanking houses, 2 windows each (1 blind). Centre with pink granite columns having foliated capitals and shaped imposts with trefoil enrichment supporting shallow slated roof over entrance and flanking canted bays. Panelled doors under toplights in plain surrounds. Recessed 4-pane sashes, ground floor bays with gauged red brick flat arches. Oval blind oculus in tympanum. Flanking houses with square-headed doorways, fanlights and panelled doors. Gauged brick flat arches to recessed 4-pane sashes, those above entrances being blind. Slab chimney-stacks rise from party walls. Original, shaped cast-iron rainwater heads. INTERIOR: several interiors now opened up. HISTORICAL NOTE: the almshouses were erected to house up to 70 poor widows or spinsters of the parish of St Martins-in-the-Fields. St Martin-in-the-Fields Almshouses and Chapel (qv), form a group. (Survey of London: Vol. XXIV, King's Cross Neighbourhood, St Pancras part IV: London: -1952: 136).

Includes: Nos.13-23 Camden Road Station BONNY STREET. Station. 1870. By EH Horne. For the North London Railway. Yellow stock brick with stone dressings. EXTERIOR: 3 storeys. Single bay entrance front on angle between Camden Road and Bonny Street: arched opening with lunette of circular tracery within gauged arch, dentil cornices at first and second floor level, parapet. Camden Road elevation contains shopfront on ground floor set below 2 brick arches; granite drinking fountain in form of a pylon to north, below railway bridge; parapet inscribed in sunken letters CAMDEN TOWN STATION. Bonny Street elevation: 4 arched windows per floor, with herringbone brick infills to first storey lunettes over stone mullions; parapet has panel inscribed in sunken letters NORTH LONDON RAILWAY. The station complex continues west along Nos 13-19 Bonny Street with offices and former waiting rooms above goods stores, all faced in the same yellow brick, with arched windows and stone mouldings. Royal College Street elevation: projecting Classical arched entrance with a pair of four-panel doors below fanlight; cornice has guttae of cut brick. INTERIOR: triangular booking hall has coffered roof with central cast-iron column. Booking office inserted 1984 replacing earlier, and of no interest. Original stairs with cast-iron rails leading up to both platforms. West-bound platform retains its projecting canopy supported on cast-iron columns with ornamental spandrels. HISTORICAL NOTE: this station was opened in December 1870, replacing an earlier station of 1850 on a different site. It is the only survivor of the Italianate brick station buildings erected in the 1870s along the North London Railway to replace the original wooden buildings of the line, and one of the few suburban stations of the period to survive in London. The extent of the ancillary buildings along Bonny Street suggests that this was a busy station of some prominence. Renamed Camden Road station in 1950, the station was refurbished in 1984 by British Railways and the Greater London Council. (Buck G: A Pictorial Survey of Railway Stations: London: -1992: 154-155; National Railway Museum: North London Railway. A Pictorial Record: York: -1979). 32. THE ELEPHANT HOUSE INCLUDING FORMER COOPERS' BUILDING, BOUNDARY WALLS AND GATE PIERS

IoE Number: 505232

Location: THE ELEPHANT HOUSE INCLUDING FORMER COOPERS' BUILDING, BOUNDARY WALLS AND GATE PIERS, HAWLEY CRESCENT, CAMDEN TOWN, CAMDEN, GREATER LONDON

Date listed: 17-Feb-2009

Grade II

Photo source: <http://manchesterhistory.net/architecture/1920/elephanthouse.html>

The Elephant House and the adjoining coopers' building, boundary walls and gate piers are designated for listing for the following principal reasons: * special architectural interest of the Elephant House's rhythmic curved elevations with giant order pilasters, good quality brickwork, and cheerful details including decorative panels of brick and terracotta; * even the elevation to the yard and the cooper's building, which lack the exuberance of the public frontages, are well crafted and detailed * the buildings were designed by the pre-eminent architect of ornamental breweries, William Bradford, who often included features which served as an advert for the brewery's products, in this case Elephant's Head Pale Ale; * increasingly rare surviving industrial complex in the inner-city and alongside London's early-C19 Regent's Canal.

798-1/0/10364 HAWLEY CRESCENT 17-FEB-09 The Elephant House including former coopers' building, boundary walls and gate piers

II Former bottle store, coopers' building and boundary walls. 1900-1 by William Bradford for the Camden Brewery. Minor later alterations.

BOTTLE STORE: now called the Elephant House and the most prominent building on the site, a two storey plus basement building with two parallel ranges under a double pitched roof running east-west along the curve of Hawley Crescent. The building is constructed of red brick on an engineering brick plinth with sandstone and rubbed brick detailing and renewed slate roofs. The elevations to Hawley Crescent and to Kentish Town Road are the most decorative, as befitting their position overlooking public thoroughfares, and are well-detailed and well-crafted.

(The Elephant House designation entry continued..)

They are articulated by rhythmic giant order brick pilasters, moulded brick cornices, and panels of decoration including sunflowers, a date stone (in the raised central parapet of the Hawley Street frontage) and the eponymous sandstone elephant's head (above the door to Kentish Town Road). Historic photographs show that the blank panels in the parapets once bore incised lettering announcing the name of the brewery; both parapets were formerly pedimented, with a second elephant's head relief in the Hawley Crescent parapet. The windows have rubbed brick segmental arches with sandstone keystones and metal panes in a variety of designs, some with rose-shaped bosses; there are nine bays to Hawley Crescent and three to Kentish Town Road. A short flight of steps leads up to the central door with granite surround on the Kentish Town Road elevation; the two windows to either side have rounded-headed relieving arches. The double gable end to the yard is simpler, but well-built nonetheless, with rubbed brick arches to the windows, cornices and projecting central sections with inset round-headed gauged brick window arches. There are former taking-in bays to the left and in the centre of the elevation which are much wider than the windows and have engineering brick surrounds. These, and a large iron hoist, lend the building industrial character.

INTERIOR: the concrete floors, with jack-arched vaulting to the ground floor, are supported by cast iron columns with bell capitals and concrete beams. Two original staircases, one of timber and the other of concrete with a metal balustrade, survive as do the timber roof trusses. In the Brewers Journal of 1901, the building was noted, unusually for a brewery building, as having lifts. The lift shafts survive, but the lifts themselves have been modernised.

COOPERS' BUILDING: The smaller building, facing the canalside, is a former coopers and has the same detailing to its yard-elevation as the bottle store. The canalside frontage is the most decorative and has an oculus in the gable with, like the other windows, gauged brickwork and stone keystones. There is a taking-in bay with surviving timber doors at the canal's waterline level and a second large bay leading out to the yard. The timber ladder-like stair and a cast iron spiral staircase survive inside the building, although the latter has been moved from its original position, and the timber roof trusses are also unchanged. Like the Elephant House, this first floor of this building also has jack-arched vaulting. The 1921 Goad maps suggest that the second floor was used for storing chaff, a byproduct of brewing.

BOUNDARY WALLS: run in two sections: east-west between the former bottle store and the second, smaller building; and east-west along the boundary to Hawley Crescent between the former bottle store and the MTV building. The walls have lower courses of engineering brick, upper ones of red brick, stone capping and recessed panels in the brickwork along the Hawley Street side. The gate piers are a similar design, with turning stones at their bases, and support wrought-iron gates.

HISTORY: Brewing became a major industry in the C18 and early C19 and brewery buildings from this period are often monumental in scale, though architecturally utilitarian or in a very plain, classical style. In the mid to late C19, however, a competitive trading environment and the influence of a small number of brewery architects led to the emergence of the 'ornamental brewery'. Just as brewery buildings now functioned as an advertisement for the brewery's products, so images of brewery plants featured in beer advertising from the 1890s. On this site in Camden, the contrast between the fragment of surviving mid-C19 brewery along the canalside and the Elephant House illustrates this development well.

William Bradford was the leading brewery architect of the last quarter of the C19 and built or adapted over seventy buildings. He was one of the first brewers' architects to emphasise the importance of architectural detail in brewery construction in his own designs and publications such as Notes of Maltings and Breweries of 1889. The Elephant House building illustrates how Bradford used good brickwork and decorative terracotta to transform what might have been functional, industrial buildings into an advertisement for a commercial enterprise. The elephant's head which appears above the main entrance to the bottle store on Kentish Town Road was the trademark of the Camden Brewery and one of their products was Elephant Pale Ale. Bradford commonly incorporated the names or logos of breweries in his designs, which may explain his popularity with brewers. By the end of the C19 this approach had become commonplace and Bradford's obituary in the Builder in 1919 noted: 'there are few towns in which he has not left some mark of his work, most of his brewery buildings bearing to a marked degree an individuality quite his own'.

REASONS FOR DESIGNATION: The former bottle stores (now Elephant House) and the adjoining coopers' building, boundary walls and gate piers are listed Grade II for the following principal reasons: * special architectural interest of the Elephant House's rhythmic curved elevations with giant order pilasters, good quality brickwork, and cheerful details including decorative panels of brick and terracotta; * even the elevation to the yard and the cooper's building, which lack the exuberance of the public frontages, are well-crafted and detailed; * the buildings were designed by the pre-eminent architect of ornamental breweries, William Bradford, who often included features which served as an advert for the brewery's products, in this case Elephant's Head Pale Ale; * increasingly rare surviving industrial complex in the inner-city and alongside London's early-C19 Regent's Canal.

Early C19 with additions and alterations c1975. Stucco. 2 storeys, 1 window with single storey 3-window entrance wing. Segmental arched doorway and panelled door facing canal; left return with similar doorway and double glazed doors. Segmental arched sashes; 1st floor in large shallow rectangular recess. Plain stucco band at cornice level. Crenellated parapet and 2 tall slab chimney-stacks. INTERIOR: not inspected. The building was extended, stuccoed and crenellated c1975.

35. HOUSE (FORMER CAMDEN TOWN ROWTON HOUSE)

IoE Number: 505028
Location: ARLINGTON HOUSE (FORMER CAMDEN TOWN ROWTON HOUSE), ARLINGTON ROAD, CAMDEN TOWN, CAMDEN, GREATER LONDON
Photographer: Emily Gee
Date photographed: 2012
Date listed: 24-Jan-2011
Grade II

II Men's Lodging House, opened in 1905, refurbished 1983-88 and 2008-10. Designed by Harry Bell Measures FRIBA. Refurbished 1983-8 and 2009-10 by Levitt Bernstein Architects.

Arlington House, formerly the Camden Town Rowton House opened in 1905, was recommended for listing at Grade II for the following principal reasons: * Architectural: an imposing landmark of a thoughtful design with richly detailed terra cotta dressings and distinctive roofscape; its scale and attention to detail reflect both its function and the idealism of its origins. * Historical: the last and largest of London's well-known Rowton Houses, built to provide accommodation for single men in the late C19 and early C20. Its origins and development through the C20 illustrate a little-recognised aspect of working-class history. * State of external preservation: the best-preserved of London's Rowton Houses, representing Measures' recognisable Rowton House design. Recent restoration work has further revealed the quality of its elevational treatment. The interior is now much altered to suit modern requirements, but the plan and character of the arched corridors survives. * Comparative quality and significance: it matches the interest of one other former men's hostel designed by Measures in Birmingham (Grade II), the two listed LCC men's hostels of the period (Carrington House and Bruce House, both Grade II) and the listed women's equivalent, Ada Lewis Women's Lodging House (Grade II).

36. PALMERS PET STORES

IoE Number: 505028

Photographer: Roger Bowdler
Date photographed: June 2013
Date listed: 31-Jul-2007
Grade II

Pet shop, c1938, on ground floor of two 1820s terraced houses.

SUMMARY OF IMPORTANCE: 35-37 Parkway are a pair of early C19 terraced houses which in c1921 were converted to retail use by Palmers Pet Stores. The shop front, dating from around 1938, is of special historic interest as a rare survival of a pet shop advertising exotic pets in the distinctive sign panels which read 'MONKEYS' and 'TALKING PARROTS'. The shop front's significance is enhanced by its proximity to London Zoo, also articulated in the shop front lettering 'REGENT PET STORES'. The building is also of special architectural interest. Firstly, the elegant 1930s shop front has good points of detail including brass surrounds to the curved glass side windows and circular parterae marking each corner of the panels; secondly there is good survival of late Georgian features, including sash windows and door cases with fluted surrounds, which relate to the first phase of the building's development as a pair of terraced houses.
