

<b>Application No:</b>	<b>Consultees Name:</b>	<b>Received:</b>	<b>Comment:</b>	<b>Response:</b>
2018/5292/P	John Spalding	19/12/2018 14:43:10	COMMEMP ER	We oppose this application. Our understanding was that HS2 might wish to use the vaults in Princess Road as a pathway for some of their cabling. If so they clearly have a prior need. If not we object to the idea of these vaults being developed as habitable units. The houses in the road are already at bursting point with their divisions into flats. Are we really agreeing to impose more stress on the infrastructure, the sewage etc. The area is already overdeveloped and unsightly with the rubbish bins now parked outside many of the front doors (through lack of space internally?) spoiling the character and ambience of the road. Cave dwelling is for troglodytes. We are also concerned that the notices of the application have not been displayed prominently in the road for people to realise that an application had been made - the yellow signs have been tampered with.
