You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work.

Where trees are protected by a Tree Preservation Order, please number them as shown in the First Schedule to the Tree Preservation Order where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below

Tree species (and the number used on the sketch plan) and description of works.

Where trees are protected by a Tree Preservation Order you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

e.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with one standard ash in the same place.

The tree we are seeking approval for is Tilia x europaea (Common Lime) tree number 13 we are wanting to fell this tree to ground level due the close proximity to the adjacent building the tree is touching the building. Also the tree is leaning over and towards the building and Hampstead lane making it a safety issue the tree also has a rained root system. A replacement tree will be planted in an area close by the existing tree.

## 6. Trees - Additional Information

### For all trees

A sketch plan clearly showing the position of trees listed in the question 'Identification of Tree(s) and Description of Works' MUST be provided when applying for works to trees covered by a Tree Preservation Order. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes).

It would also be helpful if you provided details of any advice given on site by an LPA officer.

### For works to trees covered by a TPO

**Please note: If none of the proposed work involves trees covered by a TPO, please answer 'No' to the two questions below**
