

LBC LEGAL DUTIES and EXPECTATIONS REGARDING BUILDING CONSTRUCTION/DE-CONSTRUCTION SITES**Addendum to CMR - CMP WORKING FRAMEWORK 248820 (CMPWF 248820)
Camden's Minimum Requirements (CMR) number: 248549****Site: 66 Fitzjohn's Avenue, London, NW3 5LT****Planning number: 2015/5847/P****Date: 30th November 2018****Revision:**

CMP framework which the Developer and the main Contractor agree to address in great detail and liaise with the relevant Officers of Camden's Council to minimise the impact of their activities to an acceptable levels before any building works commence.

Minimum itemised Environmental areas which the Developer and the Main Contractor agree to provide full details and liaise with the relevant Council Officers.

Itemised Environmental Areas dealt by the Pollution Team:

1. TIME FOR NOISY OPERATIONS**2. NOISY AND VIBRATION CONTROL**

- (i) Production of a noise report to include (ii to xvii below if applicable)
- (ii) The existing baseline of the ambient noise levels.
- (iii) ABC +5dB method according BS5228:2009+A1:2014
- (iv) Prediction of the noise levels at worst affected noise receptor
- (v) Full description of the noisy activities and/or operations
- (vi) Noise sources from plant/machinery/activity
- (vii) Noise type i.e. airborne, ground borne and structure borne (including causes)
- (viii) Noise impact of nearest building demolition works on existing residents.
- (ix) Impact of activities likely to be carried outside standard hours i.e. utilities connections, crane arrival and assemblage, etc.
- (x) Impact of vehicles related to the site in terms of noise during the different working phases and according different times i.e. loading-unloading, etc.
- (xi) Identification of structure borne noise respite areas during the proposed works (if required).
- (xii) The prediction of noise (including structure borne noise) at the potential noise receptors.
- (xiii) Identification of the worst affected property by the effect of noise/vibration (including structure borne) and 3D (see CMR) if applicable
- (xiv) Full details describing mitigation measures to be incorporated during the deconstruction works to prevent noise and vibration disturbances from the activities

on the site to the main receptors (including those who will remain in partial occupation during the works).

- (xv) Full details describing mitigation measures to be incorporated during the deconstruction works to prevent noise and vibration disturbances from the activities on the site to the main receptors (including those who will remain in partial occupation during the works).
- (xvi) Actions to be taken in cases where these noise levels exceed the predicted noise and vibration levels.
- (xvii) Noise and vibration monitoring approach taking into account noise type and the nearest immediate receptors

3. CONTROL OF VISIBLE DUST AND ITS MONITORING

- Prevention
- Suppression
- Containment

4. MEETING AIR QUALITY CRITERIA (NON VISIBLE DUST) AND ITS MONITORING

5. RODENT CONTROL

- Before any works is carried out ascertain the presence of rats and mice and how they will be destroyed if found on site.
- Monitoring programme

6. COMMUNITY LIAISON & MONITORING

7. CONTINUOUS REVIEWING OF THE CMP

8. ADDRESSING UNKNOWNNS

GENERAL AGREED UNDERSTANDINGS.

- (a) London Borough of Camden under the Control of Pollution Act 1974, Environmental Protection Act 1990 and Prevention of Damage by Pest Act 1949, have the legal duty to protect from the effects of noise (including vibration), statutory nuisances and pest prevention from rodents to those who are living in the proximity of the proposed works.
- (b) The Council expect to receive no valid complaints during the entire duration of the proposed works to be undertaken at, **66 Fitzjohn's Avenue, London, NW3 5LT.**
- (c) The CMP shall be a living document to be reviewed/modified as soon as problems arise or when it is required.
- (d) Noise and vibration monitoring shall be carried out. (See CMR 248820) Camden's Minimum Requirements attached)
- (e) A continuous philosophy to be incorporated, maintained, improved and enforced in:
 - (a) Noise/vibration reducing levels throughout the site and the life of the project.

A copy of this document shall be made available to the appointed Building Contractors and their sub-contractors

- (b) Prevention of dust formation in the first place, throughout the site and the life of the project
- (f) Full adherence and compliance and implementation with the 248820 CMR for the site.
- (g) Where practicable, to prevent vibration during excavations works, most modern excavating equipment and the most modern excavation techniques shall be used.
- (h) No demolition works shall be commenced without an adequate water supply to cover the whole working areas of the site.
- (i) At all times the site shall be kept free, so far as is reasonable practicable, from rats and mice. (Prevention of Damage by Pests Act 1949, part 'H' of the Building Regulations (Drainage & Waste Disposal)).
- (j) Continuous liaison with the local community, before works commence, during the works and in particular in case of exceedances and/or change of techniques or methodology and or complaints/concerns.
- (k) Full adherence and compliance and implementation with the 248820 CMR, CMPWF 248820 for the site and BS5228:2009+A1:2014.

Applicant: NB By signing this form you are confirming you are a person whose signature is recognised by your company.
