

DRIVESETT ARGENT PRIORA PERMEABLE BLOCK PAVING

Contemporary Drivesett Argent Priora Permeable Paving is a Sustainable Urban Drainage System (SUDs) for driveways.

Available in three contemporary colours, Drivesett Argent Priora is the perfect matching, yet sustainable addition to the Argent range.

Drivesett Argent Priora can drain away surface water returning it to the water table, without the need for membranes, tanks or soakaways. If installed with the correct sub-base this permeable paving solution can be used in a front garden without obtaining planning permission.
