2019/0214/P	John Myers	08/02/2019 13:05:30	SUPC	I support the application, however the bricks should be yellow stock bricks to match other properties, not red as stated on one document. The window should be timber with lambs tongue glazing bars and the sashes should be unhorned. The metal roll-down shutters currently on the shop below the proposed extension are very unsightly and inappropriate for a listed building. They should be removed. I do not know if the original consent for them (if any) specified a time limit.
