2019/0683/T	D Prince	13/02/2019 09:04:10	OBJ	I object to the felling of these mature trees. Although they are on private land they form part of the boundary with the public footpath and, as such, add considerably to the public space and contribute to the natural environment of Belsize Park. Whilst there is some impact on the boundary wall, the lean is minimal and a far less drastic measure would be to rebuild the wall so the trees become integrated into it. The only reason for not doing this would be one of cost. There is an alarming trend of trees in the conservation area being cut down. Sometimes this may be necessary if the tree is diseased or dangerous. Neither is the case here and every measure practicable should be taken to preserve the special environment of Belsize Park.
