

Application No:	Consultees Name:	Received:	Comment:	Response:
2019/0192/P	Mary Ryan	11/03/2019 13:20:15	OBJLETTE R	<p>I wish to object to this planning application on the following grounds: This application plans to double the amount of equipment on the roof of a residential building. The health hazards to residents will increase. There are many children living here and electro magnetic radiation is a hazard to the young. It is ironic that schools in the area have to be consulted re the application but not residents with children. The building will be more unsightly. It is a home to 80 families and this shouldn't be ignored. Th weight of Telecommunication buildings on the roof have caused cracks in walls in flats beneath them already. I ask if the roof can bear the weight of additional base stations. The applications have not considered applying to use other buildings in the area. Just to overburden Sidney Boyd Court. Sidney Boyd Court is within the Swiss Cottage Conservation Area and never should have had such TC developments in the first place. There is absolutely no mention of considering the residents in the application only the building and the surrounding area. what exactly is ancillary development? This is not described and could be anything and so I object to this.</p>
