

Managing the impact of development

- 6.1 Standards of amenity (the features of a place that contribute to its attractiveness and comfort) are major factors in the health and quality of life of the borough's residents, workers and visitors and fundamental to Camden's attractiveness and success. Camden's Inner London location, the close proximity of various uses and the presence of major roads and railways means that amenity is a particularly important issue within the borough.
- 6.2 Policy A1 therefore seeks to ensure that standards of amenity are protected. Other policies within the Plan also contribute towards protecting amenity by setting out our approach to specific issues, such as the impact of food, drink and entertainment uses in "Policy TC4 Town centres uses", "Policy A4 Noise and vibration", and "Policy CC4 Air quality".

Policy A1 Managing the impact of development

The Council will seek to protect the quality of life of occupiers and neighbours. We will grant permission for development unless this causes unacceptable harm to amenity.

We will:

- a. seek to ensure that the amenity of communities, occupiers and neighbours is protected;
- b. seek to ensure development contributes towards strong and successful communities by balancing the needs of development with the needs and characteristics of local areas and communities;
- c. resist development that fails to adequately assess and address transport impacts affecting communities, occupiers, neighbours and the existing transport network; and
- d. require mitigation measures where necessary.

The factors we will consider include:

- e. visual privacy, outlook;
- f. sunlight, daylight and overshadowing;
- g. artificial lighting levels;
- h. transport impacts, including the use of Transport Assessments, Travel Plans and Delivery and Servicing Management Plans;
- i. impacts of the construction phase, including the use of Construction Management Plans;
- j. noise and vibration levels;
- k. odour, fumes and dust;
- l. microclimate;
- m. contaminated land; and
- n. impact upon water and wastewater infrastructure.

Protecting amenity

- 6.3 Protecting amenity is a key part of successfully managing Camden's growth and ensuring its benefits are properly harnessed. The Council will expect development to avoid harmful effects on the amenity of existing and future occupiers and nearby properties or, where this is not possible, to take appropriate measures to minimise potential negative impacts.

Visual privacy and outlook

- 6.4 A development's impact upon visual privacy, outlook and disturbance from artificial light can be influenced by its design and layout. These issues can affect the amenity of existing and future occupiers. The Council will expect that these elements are considered at the design stage of a scheme to prevent potential harmful effects of the development on occupiers and neighbours. Further detail can be found within our supplementary planning document Camden Planning Guidance on amenity.

Sunlight, daylight and overshadowing

- 6.5 Loss of daylight and sunlight can be caused if spaces are overshadowed by development. To assess whether acceptable levels of daylight and sunlight are available to habitable, outdoor amenity and open spaces, the Council will take into account the most recent guidance published by the Building Research Establishment (currently the Building Research Establishment's Site Layout Planning for Daylight and Sunlight – A Guide to Good Practice 2011). Further detail can be found within our supplementary planning document Camden Planning Guidance on amenity.

Artificial lighting levels

- 6.6 Camden's dense character means that light pollution can be a bigger problem in the borough than in lower density areas where uses are not so close together. Artificial lighting should only illuminate the intended area and not affect or impact on the amenity of neighbours.
- 6.7 Developments in sensitive areas, such as those adjacent to sites of nature conservation, should employ a specialist lighting engineer accredited by the Institute of Lighting Engineers to ensure that artificial lighting causes minimal disturbance to occupiers and wildlife. For further information please see our supplementary planning document Camden Planning Guidance on amenity.

Transport impacts

- 6.8 The Council will consider information received within Transport Assessments, Travel Plans and Delivery and Servicing Management Plans to assess the transport impacts of development. Guidance regarding these documents is available within our supplementary planning document Camden Planning Guidance on transport. In instances where existing or committed capacity cannot meet the additional need generated by the development, we will expect proposals to provide information to indicate the likely impacts of the development and the steps that will be taken to mitigate those impacts.

- 6.9 Proposals should make appropriate connections to highways and street spaces, in accordance with Camden's road hierarchy, Transport for London's Street Type Framework and to public transport networks. Any development or works affecting the highway will also be expected to avoid disruption to the highway network, particularly emergency vehicle routes and avoid creating a shortfall to existing on-street parking conditions or amendments to Controlled Parking Zones. To avoid congestion and protect residential amenity, developments will be expected to provide on-site servicing facilities wherever possible. Major developments dependent upon large goods vehicle deliveries will also be resisted in predominantly residential areas. Further details regarding the movement of goods and materials is available within "Policy T4 Sustainable movement of goods and materials".
- 6.10 Highway safety, with a focus on vulnerable road users should also be considered, including provision of adequate sightlines for vehicles leaving the site. Development should also address the needs of vulnerable or disabled road users.
- 6.11 Highway works connected to development proposals will be undertaken by the Council at the developer's expense. This ensures that highway works, maintenance and materials adopted by the Council are constructed to an appropriate standard. This includes highway works that form part of a planning approval appropriate for adoption, including design and implementation of new routes to be adopted, owned and managed by the relevant Highway Authority. Development requiring works to the highway following development will be secured through planning obligation with the Council to repair any construction damage to transport infrastructure or landscaping and reinstate all affected transport network links and road and footway surfaces. Separate arrangements will apply for any works on roads managed by Transport for London.

Construction Management Plans

- 6.12 Disturbance from development can occur during the construction phase. Measures required to reduce the impact of demolition, excavation and construction works must be outlined in a Construction Management Plan.
- 6.13 Construction Management Plans may be sought for:
- major developments;
 - basement developments;
 - developments involving listed buildings or adjacent to listed buildings;
 - developments that could affect wildlife;
 - developments with poor or limited access on site;
 - developments that are accessed via narrow residential streets;
 - developments in areas with a high number of existing active construction sites; and;
 - developments that could cause significant disturbance due to their location or the anticipated length of the demolition, excavation or construction period.
- 6.14 We will require Construction Management Plans to identify the potential impacts of the construction phase and state how any potential negative impacts will be mitigated.
- 6.15 Whether a Construction Management Plan is required for a particular scheme will be assessed on a case by case basis. Construction Management Plans will

usually be sought for major developments, however there are many instances where smaller schemes can have very significant impacts, particularly within predominantly residential areas.

- 6.16 A Construction Management Plan will usually be secured via planning obligations between the developer and the Council after an application is approved. We will expect developers to sign up to the Considerate Constructors Scheme and follow guidance within Camden's Considerate Contractors Manual. Financial contributions and monitoring fees may also be sought if necessary.
- 6.17 The level of detail contained within a Construction Management Plan should be proportionate to the scale and/or complexity of the development. To assist developers in providing the right information, the Council has created a Construction Management Plan Pro-forma which is tailored towards the specific needs of the borough. The criterion in the Pro-forma are drawn from relevant aspects of Transport for London's (TfL) Construction Logistics Plans and follows TfL's construction safety best practice guidelines. Construction Logistics and Cyclist Safety scheme (CLOCS) standards and Camden's Minimum Requirements for Building Construction also form the basis for the Pro-forma criterion. The Pro-forma is available on the Council's website.
- 6.18 The Council seeks to minimise the movement of goods and materials by road through the use of consolidation facilities and rail and water freight where possible. Please see "Policy T4 Sustainable movement of goods and materials" on the movement of goods and materials for further detail. For further details regarding Construction Management Plans please refer to our supplementary planning documents Camden Planning Guidance on amenity and Camden Planning Guidance on planning obligations.

Noise and vibration

- 6.19 Noise and vibration can have a major effect on amenity. The World Health Organisation (WHO) for example states that excessive noise can seriously harm human health, disturb sleep and have cardiovascular and behavioural effects. Camden's high density and mixed-use nature means that disturbance from noise and vibration is a particularly important issue in the borough.
- 6.20 Where uses sensitive to noise are proposed close to an existing source of noise or when development that is likely to generate noise is proposed, the Council will require an acoustic report to accompany the application. Further detail can be found in "Policy A4 Noise and vibration" and our supplementary planning document Camden Planning Guidance on amenity.

Odours, fumes and dust

- 6.21 Odours, fumes and dust can be generated from commercial cooking, industrial process and construction and demolition which have the potential to cause a range of health problems, including respiratory diseases.
- 6.22 We will require all development likely to generate nuisance odours to install appropriate extraction equipment and other mitigation measures. These should be incorporated within the building where possible. External extraction equipment and ducting should be sited sensitively, particularly on listed buildings and within conservation areas. Further details can be found in our

supplementary planning documents Camden Planning Guidance on design and Camden Planning Guidance on amenity.

- 6.23 The Council will limit the disturbance from dust due to construction and demolition by expecting developers and their contractors to follow the Greater London Authority and London Councils' Best Practice Guidance: The control of dust and emissions from construction and demolition. Details of how these measures will be implemented should be provided in a Construction Management Plan. Further information regarding the management of dust can be found within "Policy CC4 Air quality".

Microclimate

- 6.24 Large developments can alter the local climate. Buildings can affect the flow of air and cause wind tunnels which can potentially affect the enjoyment of public spaces. A building's colour can affect how much heat it absorbs and therefore impact upon local air temperatures. Developments should therefore consider local topography and the local microclimate in their design. Developments large enough to alter the local climate will be required to submit a statement demonstrating how the design has considered local conditions. Further detail can be found in our supplementary planning documents Camden Planning Guidance on sustainability and Camden Planning Guidance on amenity.

Contaminated Land

- 6.25 Development on contaminated land can expose people to a wide range of potential health risks. Examples of sites that may have contaminated land include those that have been used for vehicle repair, industrial processes and petrol stations. The Council will expect proposals for the redevelopment of sites that are known to be contaminated, have the potential to be contaminated, or are located in close proximity to such sites to submit relevant assessments and take appropriate remedial action to the Council's satisfaction if required. Remedial action is particularly important in developments where people will have access to the ground for gardening, play or planting food for consumption. Please refer to our Contaminated Land team and our supplementary planning document Camden Planning Guidance on amenity for further information.

Water and wastewater infrastructure

- 6.26 The Council will work with water providers to ensure that there is adequate water and wastewater infrastructure serving developments likely to put pressure on existing water infrastructure. Developers may be required to demonstrate that there is adequate infrastructure capacity both on and off the site to serve the development and that it would not lead to reductions in water pressure, sewer flooding or overloading of existing water and wastewater infrastructure. Where there is a infrastructure capacity constraint and no improvements are programmed by the water provider, we will use planning conditions and/or obligations requiring developers to provide secure mitigation and compensatory measures which must be completed prior to occupation of the development. Further information regarding flood risk, drainage and water supply can be found within "Policy CC3 Water and flooding" and further detail regarding obligations can be found within our supplementary planning document Camden Planning

Guidance on planning obligations.

Noise and vibration

- 6.84 This policy seeks to ensure that noise and vibration is appropriately considered at the design stage and that noise sensitive uses are not negatively impacted by noise and vibration or that existing uses (such as music venues, theatres and some employment uses) are not unduly restricted through the introduction of nearby noise sensitive uses.
- 6.85 Noise and vibration can have a major effect on health and amenity and quality of life. Camden's high density and mixed use nature means that disturbance from noise and vibration is a particularly important issue for health and wellbeing in the borough. The Council may seek to explore the identification and designation of Quiet Areas, which are local green spaces identified for their particular tranquility and amenity value.

Policy A4 Noise and vibration

The Council will seek to ensure that noise and vibration is controlled and managed.

Development should have regard to Camden's Noise and Vibration Thresholds (Appendix 3). We will not grant planning permission for:

- a. development likely to generate unacceptable noise and vibration impacts; or
- b. development sensitive to noise in locations which experience high levels of noise, unless appropriate attenuation measures can be provided and will not harm the continued operation of existing uses.

We will only grant permission for noise generating development, including any plant and machinery, if it can be operated without causing harm to amenity. We will also seek to minimise the impact on local amenity from deliveries and from the demolition and construction phases of development.

Sources and the character of noise in Camden

- 6.86 The main sources of noise and vibration in Camden are; road traffic, railways, industrial uses, plant and mechanical equipment, food, drink and entertainment uses, and building sites. The top six sources of noise that receive the most complaints in Camden are; music, construction noise, general people noise (e.g. footsteps, gathering), parties, fixed machinery and burglar alarms.
- 6.87 There is a proliferation of fixed machinery, such as air conditioning units in Camden's centres which cumulatively can have a harmful impact. The borough is also home to a large number and variety of food, drink and entertainment uses, often close to where people live, and as a result, conflicts can arise (see "Policy TC4 Town centres uses"). Such sources of noise and the character of noise can increase stress levels and cause significant disturbance. Other sources of noise such as those associated with construction are considered in "Policy A1 Managing the impact of development", whereby measures required

to attenuate impacts are secured by legal agreement through a Construction Management Plan.

- 6.88 The aim within development proposals should be to design out noise prior to proposing mitigation. The effect of noise and vibration can be minimised by separating uses sensitive to noise and vibration from sources that generate them and by taking other design and operational measures to reduce any impact.

Assessing the impact of noise and vibration

- 6.89 Where uses sensitive to noise and vibration are proposed close to an existing source of noise or when development is likely to generate noise is proposed, the Council will require an acoustic report to accompany the application. In assessing applications, we will have regard to noise and vibration thresholds, set out in Appendix 3, and other relevant national and regional policy and guidance and British Standards. Further guidance on the application of these standards will be provided in supplementary planning document Camden Planning Guidance on amenity.
- 6.90 Noise sensitive development includes housing, schools and hospitals as well as offices, workshops and open spaces. The impacts on external amenity spaces such as gardens and balconies will also be considered. Our supplementary planning document provides further information on how to minimise the impact of noise of developments; ways to mitigate noise emitted from developments and further detail on how the Council will assess the impact of noise and vibration.
- 6.91 Noise generating uses and fixed machinery will likely have a greater impact on amenity when the background noise level is lower or in areas where noise sensitive uses such as residential developments co-exist with other uses. The Council will take into consideration the general character of the noise (whether noise is intermittent, has a distinct screech, bang, hiss) and where appropriate, the cumulative impacts of noise from one or more noise sources and will assess whether tighter noise restrictions, secured by planning condition, should be imposed.
- 6.92 Planning permission will not normally be granted for development sensitive to noise in locations that have unacceptable levels of noise and vibration. The Council will only grant planning permission for development sensitive to noise and vibration, in locations that experience high levels of noise and for development likely to generate noise impacts, if appropriate attenuation measures can be taken. Such attenuation measures should be included on plans. Planning permission will not be granted in instances where there will be a significant adverse impact on external amenity areas including gardens, balconies and open spaces unless they can be appropriately mitigated.
- 6.93 In cases where noise sensitive development is proposed in close proximity to an existing noise generating use (such as music venues and pubs) the Council will determine whether the introduction of the sensitive use will be harmful to the existing premises continued operation. In some cases the Council may require the developer to be responsible for future costs of soundproofing (known as the “agent of change” principle), secured by a legal agreement.

- 6.94 The Council will also consider the impact of attenuation measures on the character and appearance of the building and locality (see “Policy D1 Design” and associated supplementary planning document Camden Planning Guidance on design). Measures to mitigate the impacts of noise and vibration associated with demolition and construction will be secured by legal agreement through Construction Management Plans (“Policy A1 Managing the impact of development”).

Acoustic reports

- 6.95 Where uses sensitive to noise and vibration are proposed close to an existing source of noise or when development that is likely to generate noise is proposed, the Council will require an acoustic report to accompany the application. Supplementary planning document Camden Planning Guidance on amenity provides further detail of the key information expected to be reported in acoustic reports.
- 6.96 Camden noise thresholds (see Appendix 3) reflect observed effect levels outlined in National Planning Practice Guidance and will be explained further in the Camden Planning Guidance on amenity supplementary planning document. The thresholds set noise levels for:
- noise sensitive development in areas of existing noise; and
 - noise generating development in areas sensitive to noise.

Internal noise levels and vibration

- 6.97 Planning permission will not be granted where it is not possible to achieve suitable and sufficient internal noise levels with reference to the most up to date and appropriate guidance. This will be of particular relevance to new residential developments in areas of existing noise but will also include other noise sensitive uses. Conditions may be imposed to require that suitable internal noise levels are achieved and where appropriate, post installation testing to demonstrate that the standards have been met.
- 6.98 The most common sources of vibration that a development is likely to be exposed to are railways and industrial or commercial sites. Where a development sensitive to vibration is proposed in an area that vibration is anticipated to be present, an appropriate vibration survey should be carried out. Where vibration levels exceed those set out in Appendix 3 the proposal should demonstrate that vibration can be mitigated to acceptable levels.

Plant and other noise generating equipment

- 6.99 Planning conditions will be imposed to require that plant and equipment which may be a source of noise is kept working efficiently and within the required noise limits and time restrictions. Air conditioning will only be permitted where it is demonstrated that there is a clear need for it after other measures have been considered (“Policy CC2 Adapting to climate change”). Conditions may also be imposed to ensure that attenuation measures are kept in place and are effective throughout the life of the development.
- 6.100 Emergency equipment such as generators which are only to be used for short periods of time will be required to meet the noise criteria of no more than

10dB above the background level (L90 15 minutes). During standby periods, emergency equipment will be required to meet the usual criteria for plant and machinery. Conditions to this effect may be imposed in instances where emergency equipment forms part of the application.

- 6.101 Security alarms cause significant disruption to local amenity and wellbeing. Whilst security alarms would generally not require planning permission, we would strongly encourage developers and householders to install silent alarms or alarms with a maximum of a 20 minute cut out.

Food, drink, entertainment and leisure noise

- 6.102 Assessments for noise and vibration from entertainment and leisure premises must include consideration of amplified and unamplified music, human voices, footfall and vehicle movements and general activity. The impact of noise and vibration from food, drink and entertainment uses is outlined in “Policy TC4 Town centres uses”. Generally, these uses and noise from leisure uses alter the noise environment through audio devices, amplified and unamplified music, footfall, congregations of people, plant and equipment, deliveries and transport and can be particularly evident when the background noise level is quieter.
- 6.103 Where such uses are considered acceptable planning conditions restricting opening hours will be imposed to ensure that they do not adversely impact nearby noise sensitive uses.

Delivery management

- 6.104 Deliveries, collections and the loading and unloading of goods and refuse can be a source of disruption and cause noise nuisance to nearby residential properties, particularly when undertaken at night. Therefore, to manage potential noise issues from deliveries, conditions will usually be applied to require deliveries, collections and the loading and unloading of goods and refuse take place between the hours of 08:00 to 20:00.
- 6.105 Developments requiring deliveries outside of these times will be required to provide an acoustic report to demonstrate there will be no adverse impact on the acoustic environment with particular reference to residential occupiers as a result of these activities. This could be inserted within the wider Delivery and Servicing Management Plan of the site. Regard should also be taken to the Noise Abatement Society’s silent approach quiet time delivery scheme and TfL ‘Retimed Deliveries’ to mitigate the negative effects of possible out of hours deliveries.
- 6.106 Please see “Policy T4 Sustainable movement of goods and materials” and “Policy A1 Managing the impact of development”.

Basements

- 6.107 With a shortage of development land and high land values in the borough, the development of basements is a popular way of gaining additional space in homes. Basements are also often included in developments in the Central London part of Camden and used for various purposes including commercial, retail and leisure uses, servicing and storage.
- 6.108 Basement development and other development that involves excavation changes the ground and water conditions of the area which can potentially lead to ground instability or flooding. Basement development can also have significant construction impacts due to the need to remove spoil and the general complexities of excavation. The Council recognises the need to protect the environment and adjoining neighbours properties and buildings from these impacts.
- 6.109 When this policy refers to basement development this includes basements, lightwells and other underground development.
- 6.110 A basement is a floor of a building which is partly or entirely below ground level. A ground or lower ground floor with a floor level partly below the ground level (for example on a steeply sloping site) will therefore generally be considered basement development.
- 6.111 When this policy refers to gardens and garden space this includes all outdoor (unbuilt) space on the property, including paved areas, driveways, as well as grassed or landscaped areas.
- 6.112 The following policies in this Local Plan are also relevant to basement development and will be taken into account when assessing basement schemes:
- “Policy A2 Open space”;
 - “Policy A3 Biodiversity”;
 - “Policy D1 Design”;
 - “Policy D2 Heritage”; and
 - “Policy CC3 Water and flooding”.

Design

- 7.1 Good design is essential to creating places, buildings, or spaces that work well for everyone, look good, last well and will adapt to the needs of future generations. The National Planning Policy Framework establishes that planning should always seek to secure high quality design and that good design is indivisible from good planning.

Policy D1 Design

The Council will seek to secure high quality design in development. The Council will require that development:

- a. respects local context and character;
- b. preserves or enhances the historic environment and heritage assets in accordance with “Policy D2 Heritage”;
- c. is sustainable in design and construction, incorporating best practice in resource management and climate change mitigation and adaptation;
- d. is of sustainable and durable construction and adaptable to different activities and land uses;
- e. comprises details and materials that are of high quality and complement the local character;
- f. integrates well with the surrounding streets and open spaces, improving movement through the site and wider area with direct, accessible and easily recognisable routes and contributes positively to the street frontage;
- g. is inclusive and accessible for all;
- h. promotes health;
- i. is secure and designed to minimise crime and antisocial behaviour;
- j. responds to natural features and preserves gardens and other open space;
- k. incorporates high quality landscape design (including public art, where appropriate) and maximises opportunities for greening for example through planting of trees and other soft landscaping,
- l. incorporates outdoor amenity space;
- m. preserves strategic and local views;
- n. for housing, provides a high standard of accommodation; and
- o. carefully integrates building services equipment.

The Council will resist development of poor design that fails to take the opportunities available for improving the character and quality of an area and the way it functions.

Tall buildings

All of Camden is considered sensitive to the development of tall buildings. Tall buildings in Camden will be assessed against the design criteria set out above and we will also give particular attention to:

- p. how the building relates to its surroundings, both in terms of how the base of the building fits in with the streetscape and how the top of a tall building affects the skyline;
- q. the historic context of the building's surroundings;
- r. the relationship between the building and hills and views;
- s. the degree to which the building overshadows public spaces, especially open spaces and watercourses; and
- t. the contribution a building makes to pedestrian permeability and improved public accessibility.

In addition to these design considerations tall buildings will be assessed against a range of other relevant policies concerning amenity, mixed use and sustainability.

Public art

The Council will only permit development for artworks, statues or memorials where they protect and enhance the local character and historic environment and contribute to a harmonious and balanced landscape design.

Excellence in design

The Council expects excellence in architecture and design. We will seek to ensure that the significant growth planned for under "Policy G1 Delivery and location of growth" will be provided through high quality contextual design.

Local context and character

- 7.2 The Council will require all developments, including alterations and extensions to existing buildings, to be of the highest standard of design and will expect developments to consider:
- character, setting, context and the form and scale of neighbouring buildings;
 - the character and proportions of the existing building, where alterations and extensions are proposed;
 - the prevailing pattern, density and scale of surrounding development;
 - the impact on existing rhythms, symmetries and uniformities in the townscape;
 - the composition of elevations;
 - the suitability of the proposed design to its intended use;
 - inclusive design and accessibility;
 - its contribution to public realm and its impact on views and vistas; and
 - the wider historic environment and buildings, spaces and features of local historic value.
- 7.3 The Council will welcome high quality contemporary design which responds to its context, however there are some places of homogenous architectural style (for example Georgian Squares) where it is important to retain it.
- 7.4 Good design takes account of its surroundings and preserves what is distinctive and valued about the local area. Careful consideration of the characteristics of a site, features of local distinctiveness and the wider context is needed in order to achieve high quality development which integrates into its surroundings. Character is about people and communities as well as the physical components.

How places have evolved historically and the functions they support are key to understanding character. It is important to understand how places are perceived, experienced and valued by all sections of the community. People may value places for different reasons, often reflecting the services or benefits they provide for them. In addition, memory and association are also a component of how people understand a place. All of these values and experiences are part of understanding the character of a place. Planning applications should include a Design and Access Statement which assesses how the development has been informed by and responds to local context and character.

- 7.5 Design should respond creatively to its site and its context including the pattern of built form and urban grain, open spaces, gardens and streets in the surrounding area. Where townscape is particularly uniform attention should be paid to responding closely to the prevailing scale, form and proportions and materials.
- 7.6 The Council has two sets of documents which describe the character and appearance of areas and set out how we will preserve or enhance them. Each conservation area has a Conservation Area Statement or Appraisal and Management Strategy. These detailed documents have been developed with the relevant Conservation Area Advisory Committee and are adopted supplementary planning documents. For areas outside of conservation areas the Council commissioned the Camden Character Study to identify and record their character. This is not a formal supplementary planning document. These documents can help developers to inform their understanding of the specific character of the area in which their proposals are located. "Policy D2 Heritage" provides further guidance on the preservation and enhancement of the historic environment. When assessing design, we will also take into account guidance contained within supplementary planning document Camden Planning Guidance on design. For areas where Neighbourhood Plans are being prepared, these documents will form a valuable source of information on the character of the local area.

Sustainable design and durability

- 7.7 The Council expects development to be sustainable in design and construction. Development should be consistent with the policies set out in section 8 of this plan on sustainability and also consistent with Camden Planning Guidance on sustainability.
- 7.8 Design should be durable in construction and where appropriate should be flexible and adaptable for a range of uses over time, a quality known as robustness. Robustness is influenced by factors including the size and shape of rooms, points of access and the depth of floorplates. The overall quality of a building is also a consideration as buildings with character and charm are more likely to be retained and adapted.

Details and materials

- 7.9 Architectural detailing should be carefully integrated into a building. In new development, detailing should be carefully considered so that it conveys quality of design and creates an attractive and interesting building. Architectural features on existing buildings should be retained wherever possible, as their

loss can harm the appearance of a building by eroding its detailing. The insensitive replacement of windows and doors can spoil the appearance of buildings and can be particularly damaging if the building forms part of a uniform group.

- 7.10 Schemes should incorporate materials of a high quality. The durability and visual attractiveness of materials will be carefully considered along with their texture, colour, tone and compatibility with existing materials. Alterations and extensions should be carried out in materials that match the original or neighbouring buildings, or, where appropriate, in materials that complement or enhance a building or area.

Street frontages and legibility

- 7.11 Building facades should be designed to provide active frontages and respond positively to the street. Active frontages are building facades that allow people on the street to see inside the building. A more active type of frontage is one where the use opens out to the street, like a shop with a window display and entrance, or a use like a café or restaurant with outdoor dining. Active frontages add interest and vitality to public spaces. Views into buildings provide interest to passers-by and views out of buildings provide safety through passive surveillance or 'eyes on the street'. Positive factors for frontages are entrances, shop fronts and windows. Negative factors include long blank facades, high boundary walls, solid roller shutters and service entrances and yards.
- 7.12 Buildings and spaces should also allow people to easily navigate their way around an area – a quality known as legibility. Designs should provide recognisable routes and be easy to understand. Buildings and spaces should be permeable by providing clear and direct routes between places. Routes should be direct, safe and attractive for walking and cycling.
- 7.13 Ground floors in new developments should have a storey height appropriate to their use. In mixed use schemes where a commercial use is provided on the ground floor this should typically have a more generous storey height (of approximately 4.5m). Further information on the design of retail spaces is in "Policy TC2 Camden's centres and other shopping areas".

Access

- 7.14 Good access benefits everyone. The Council requires new buildings and spaces to be inclusive and accessible to all. As accessibility is influenced by perceptions as well as physical factors, buildings should also be designed to appear, as well as be, fully accessible. The Council will require Design and Access Statements for developments to show how the principles of inclusive design, ensuring access for all, have been integrated into the proposed development and how inclusion will be maintained and managed.
- 7.15 Making roads and pavements and the spaces between buildings fully accessible is as important as making the buildings themselves accessible. The Council will seek improvements for all pedestrians to ensure good quality access and circulation arrangements, including improvements to existing routes and footways. The Camden Streetscape Design Manual and our supplementary planning documents Camden Planning Guidance on design and Camden Planning Guidance on amenity provide more detailed information on this issue.

- 7.16 Any adaptation of existing buildings must respond to access needs whilst ensuring that alterations are sympathetic to the building's character and appearance. Please refer to "Policy C6 Access for all" for the Council's policies on access and to "Policy D2 Heritage" for the policy on providing access to listed buildings.

Health

- 7.17 The way an area is designed and managed can have a significant impact on people's quality of life, health and wellbeing. Planning has a key role in promoting good physical and mental health by creating streets, spaces and buildings which allow and encourage healthy lifestyles. Architecture and urban design can affect human health through the quality and design of buildings and spaces, access to open space and nature, air quality, noise, opportunities for active transport such as walking and cycling, crime reduction and social cohesion. The Council will require applicants to consider how development will contribute to improving health. Please see "Policy C1 Health and wellbeing" and Sport England's Active Design Guidance for further information on the principles of Active Design.

Secure design and crime prevention through urban design

- 7.18 Design should create safe and attractive places and be designed to prevent crime and antisocial behaviour. The impacts of proposals on crime and community safety should be considered and addressed from an early stage in the design process to prevent the need for reactive security measures. Access and movement routes, the layout of buildings, overlooking and active frontages, lighting, the clear delineation of spaces and ownership and the creation of activity all play a role in designing out crime. The Council will seek to maintain good accessibility in urban areas to foster flows of movement which produce vitality and natural surveillance and in doing so increase safety. Gating as a solution to crime and antisocial behaviour problems will be resisted unless there are exceptional circumstances. Further details are set out in supplementary planning document Camden Planning Guidance on design and in the document Safer Places – The Planning System and Crime Prevention (ODPM April 2004). Please refer to "Policy C5 Safety and security" for further information.

Responding to natural features and preserving gardens and open space

- 7.19 New developments should respond to the natural assets of a site and its surroundings, such as slopes and height differences, trees and other vegetation. Extensions and new developments should not harm existing natural habitats, including in private gardens. "Policy A3 Biodiversity" sets out the Council's policy on nature conservation, protecting trees and biodiversity.
- 7.20 Development within rear gardens and other undeveloped areas can often have a significant impact upon the amenity and character of an area. The Council will resist development that occupies an excessive part of a garden and where there is a loss of garden space which contributes to the character of the townscape.
- 7.21 The Council will resist development which fails to preserve or is likely to damage trees on a site which make a significant contribution to the character and amenity of an area. Where appropriate the Council will seek to ensure that

developments make adequate provision for the planting and growth to maturity of large trees.

Landscape design and greening

- 7.22 The Council will expect development schemes to provide a high standard of landscape design and encourages the development of green and brown roofs and walls. The design of new hard and soft landscaping should be contextual and consider access requirements. Where appropriate, the Council will expect planting plans to be accompanied by a maintenance schedule. Detail on our approach to green infrastructure and landscape design is set out in Camden Planning Guidance on design and Camden Planning Guidance on sustainability supplementary planning documents.

Amenity space

- 7.23 Private outdoor amenity space including gardens, balconies and roof terraces, can add significantly to resident's quality of life and applicants are therefore encouraged to explore all options for the provision of new private outdoor space. Please refer to "Policy A2 Open space" for the Council's approach to ensuring that new open space is provided in development. The Council also requires that the residential amenity of neighbours be considered in accordance with "Policy A1 Managing the impact of development".

Public art

- 7.24 The Council encourages provision of high quality public art in development where appropriate. Public art can help to create a distinctive character to places and spaces. As well as adding visual interest it can influence the use of a space, encouraging or discouraging particular uses, or it can act as a focal point to provide directions. Public art can take many forms and occupy sites and spaces that span a range of scales and of varying character. It may take the more traditional form of a sculpture or other artwork in a public space but could also be conceived as a garden, the façade of a building or a lighting installation. Public art should be designed to be an integral part of a new development.
- 7.25 In assessing applications for artworks, statues and memorials the Council will also take into consideration the matters set out in the supplementary planning

document Camden Planning Guidance on design, including:

- the number of artworks, statues, or memorials already in the area;
- whether the proposal has contextual and historic connections to the site; and
- whether the proposal meets the Council's corporate guidance on artworks, statues and memorials.

Views

- 7.26 A number of London's most famous and valued views originate in, or extend into, Camden. These are:
- views of St Paul's Cathedral from Kenwood, Parliament Hill and Primrose Hill;
 - views of the Palace of Westminster from Primrose and Parliament Hills; and
 - background views of St Paul's from Greenwich and Blackheath.
- 7.27 The Council will protect these views in accordance with London-wide policy and will resist proposals that would harm them. Where existing buildings that affect a view are redeveloped it is expected that any replacement building will be of a height that does not harm the view. The current framework for protecting these views is set by the London Plan (policies 7.11 and 7.12) and the Mayor's London View Management Framework supplementary planning guidance.
- 7.28 The Council will also consider the impact of a scheme, in terms of the townscape, landscape and skyline, on the whole extent of a view ('panorama'), not just the area in the view corridor. Developments should not detract from the panorama as a whole and should fit in with the prevailing pattern of buildings and spaces. They should seek to avoid buildings that tightly define the edges of the viewing corridors and not create a crowding effect around the landmark.
- 7.29 The Council will also seek to protect locally important views that contribute to the interest and character of the borough. These include:
- views of and from large public parks and open spaces, such as Hampstead Heath, Kenwood Estate, Primrose Hill and Regent's Park, including panoramic views, as well as views of London Squares and historic parks and gardens;
 - views relating to Regent's Canal;
 - views into and from conservation areas; and
 - views of listed and landmark buildings, monuments and statues (for example, Centrepoint, St Stephen's, Rosslyn Hill and St George's, Bloomsbury).
- 7.30 The Council will seek to ensure that development is compatible with such views in terms of setting, scale and massing and will resist proposals that we consider would cause harm to them. Development will not generally be acceptable if it obstructs important views or skylines, appears too close or too high in relation to a landmark or impairs outlines that form part of the view. Further guidance on important local views is set out in our supplementary planning documents, for example in individual conservation area statements, appraisals and management strategies.
- 7.31 The Council recognises that neighbouring boroughs have identified views for protection in supplementary planning documents and that development on some sites within Camden could affect these views. The Council will take into consideration these protected views of neighbouring authorities when deciding

planning applications.

Design of housing

7.32 All residential developments are required to be designed and built to create high quality homes. The Council will seek to ensure that residential development, both new build and change of use:

- is self-contained and has its own secure private entrance;
- has good ceiling heights and room sizes;
- is dual aspect except in exceptional circumstances;
- has good natural light and ventilation;
- has good insulation from noise and vibration;
- has a permanent partition between eating and sleeping areas (studio flats are acceptable where they provide adequate space to separate activities);
- incorporates adequate storage space;
- incorporates outdoor amenity space including balconies or terraces; and
- is accessible and adaptable for a range of occupiers.

7.33 New dwellings and conversions to residential use will be expected to meet the government's nationally described space standard as set out in London Plan Table 3.3. The Council will also require development to adhere to the Mayor's Housing Supplementary Planning Guidance.

Building services equipment

7.34 Building services equipment, such as air cooling, heating, ventilation and extraction systems, lift and mechanical equipment, as well as fire escapes, ancillary plant and ducting should be contained within the envelope of a building or be located in a visually inconspicuous position.

Tall buildings

7.35 For this policy tall buildings are considered to be those which are substantially taller than their neighbours or which significantly change the skyline. While tall buildings offer the opportunity for intensive use, their siting and design should be carefully considered in order not to detract from the nature of surrounding places and the quality of life for living and working around them. Applications for tall buildings will be considered against Local Plan policies on design and heritage, along with the full range of policies, including those on mixed use, sustainability, amenity and microclimate. The effect on views and provision of communal and private amenity space will also be important considerations. In assessing applications for tall buildings the Council will have regard to the London Plan Policy 7.7 on the location of tall and large buildings and the Historic England Advice Note 4 on Tall Buildings.

7.36 Due to the dense nature of Camden with extensive range and coverage of heritage assets, such as conservation areas, numerous listed buildings and five strategic views and two background views crossing the borough, the Council do not consider that it is practical to identify broad areas either suitable, or not suitable, for tall buildings. In the borough, a site may be suitable for a tall building while adjacent sites are not, due to impact on either views, conservations areas or listed buildings. Indeed, in some cases, suitability for a tall building differs across a single site. Given Camden's environmental

characteristics, the entire borough is considered as being within the 'sensitive' category, as defined by the English Heritage / CABE Guidance on Tall Buildings. Tall building proposals in Camden will therefore merit detailed design assessments.

7.37 Further relevant guidance to the Council's approach to tall buildings is set out in:

- Area Action Plans including the Euston Area Plan and the Fitzrovia Area Action Plan;
- Site Allocations;
- Conservation area appraisals and management strategies;
- The Camden Character Study; and
- Neighbourhood Plans.

7.38 The Council will take these documents into account where relevant in assessing applications for tall buildings.

Heritage

Camden's heritage

- 7.39 Camden has a rich architectural heritage with many special places and buildings from throughout Camden's history (see "Map 4: Heritage and Archaeological Sites" on page 210). 39 areas, covering much of the borough, are designated as conservation areas, recognising their special architectural or historic interest and their character and appearance. We have prepared conservation area statements, appraisals and management strategies that provide further guidance on the character of these areas. We will take these documents into account as material considerations when we assess applications for planning permission in these areas.
- 7.40 Over 5,600 buildings and structures in Camden are nationally listed for their special historical or architectural interest and 53 of the borough's squares are protected by the London Squares Preservation Act 1931. In addition, 14 open spaces in Camden are on Historic England's Register of Parks and Gardens. The Council also maintains a local list of over 400 non-designated heritage assets. Camden also has a generally well-preserved archaeological heritage, with 13 identified archaeological priority areas, although this can be vulnerable to development and changes in land use.
- 7.41 The Council places great importance on preserving the historic environment. Under the Planning (Listed Buildings and Conservation Areas) Act the Council has a responsibility to have special regard to preserving listed buildings and must pay special attention to preserving or enhancing the character or appearance of conservation areas. The National Planning Policy Framework states that in decision making local authorities should give great weight to conservation of designated heritage assets in a manner appropriate to their significance. The Council expects that development not only conserves, but also takes opportunities to enhance, or better reveal the significance of heritage assets and their settings.

Map 4: Heritage and Archaeological Sites

- Conservation area
- Listed building
- Archaeological priority area
- London Squares
- Gardens and Squares of Historic Interest
- Borough boundary

Policy D2 Heritage

The Council will preserve and, where appropriate, enhance Camden's rich and diverse heritage assets and their settings, including conservation areas, listed buildings, archaeological remains, scheduled ancient monuments and historic parks and gardens and locally listed heritage assets.

Designated heritage assets

Designated heritage assets include conservation areas and listed buildings. The Council will not permit the loss of or substantial harm to a designated heritage asset, including conservation areas and Listed Buildings, unless it can be demonstrated that the substantial harm or loss is necessary to achieve substantial public benefits that outweigh that harm or loss, or all of the following apply:

- a. the nature of the heritage asset prevents all reasonable uses of the site;
- b. no viable use of the heritage asset itself can be found in the medium term through appropriate marketing that will enable its conservation;
- c. conservation by grant-funding or some form of charitable or public ownership is demonstrably not possible; and
- d. the harm or loss is outweighed by the benefit of bringing the site back into use.

The Council will not permit development that results in harm that is less than substantial to the significance of a designated heritage asset unless the public benefits of the proposal convincingly outweigh that harm.

Conservation areas

Conservation areas are designated heritage assets and this section should be read in conjunction with the section above headed 'designated heritage assets'. In order to maintain the character of Camden's conservation areas, the Council will take account of conservation area statements, appraisals and management strategies when assessing applications within conservation areas.

The Council will:

- e. require that development within conservation areas preserves or, where possible, enhances the character or appearance of the area;
- f. resist the total or substantial demolition of an unlisted building that makes a positive contribution to the character or appearance of a conservation area;
- g. resist development outside of a conservation area that causes harm to the character or appearance of that conservation area; and
- h. preserve trees and garden spaces which contribute to the character and appearance of a conservation area or which provide a setting for Camden's architectural heritage.

Listed Buildings

Listed buildings are designated heritage assets and this section should be read in conjunction with the section above headed 'designated heritage assets'. To preserve or enhance the borough's listed buildings, the Council will:

- i. resist the total or substantial demolition of a listed building;
- j. resist proposals for a change of use or alterations and extensions to a listed building where this would cause harm to the special architectural and historic interest of the building; and
- k. resist development that would cause harm to significance of a listed building through an effect on its setting.

Archaeology

The Council will protect remains of archaeological importance by ensuring acceptable measures are taken proportionate to the significance of the heritage asset to preserve them and their setting, including physical preservation, where appropriate.

Other heritage assets and non-designated heritage assets

The Council will seek to protect other heritage assets including non-designated heritage assets (including those on and off the local list), Registered Parks and Gardens and London Squares.

The effect of a proposal on the significance of a non-designated heritage asset will be weighed against the public benefits of the proposal, balancing the scale of any harm or loss and the significance of the heritage asset.

Enhancing the historic environment

7.42

The Council has a proactive approach to conserving heritage assets. In addition to the application of Local Plan policies the Council protects the historic environment through the following areas of work:

- Conservation Area Management Strategies: The Council works with the Conservation Area Advisory Committees to update and support the implementation of the strategies.
- Heritage at Risk: The Council identifies buildings and structures at risk and proactively seeks to conserve and where required put them back into viable use, including identifying sources of funding.
- Local list of undesignated heritage assets: The Council introduced the local list in 2015 and it will be updated annually.
- Guidance: The Council has adopted detailed guidance for the preservation of heritage assets in the supplementary planning document Camden Planning Guidance on design, and Retrofitting Planning Guidance (for sustainability measures in historic buildings). The Council updates planning guidance as required.
- Area based work: Conservation and enhancement of the historic environment is a key objective of area action plans and the Site Allocations.

The Fitzrovia Area Action Plan for example sets principles for developing key sites which retain and enhance the setting of listed buildings.

- 7.43 The Council recognises that development can make a positive contribution to, or better reveal the significance of, heritage assets and will encourage this where appropriate. Responding appropriately to the significance of heritage assets and its setting can greatly enhance development schemes (for example, King's Cross Central).

Designated heritage assets

- 7.44 Designated heritage assets include listed buildings and structures, registered parks and gardens and conservation areas. The Council will apply the policies above and will not permit harm to a designated heritage asset unless the public benefits of the proposal outweigh the harm. Further guidance on public benefits is set out in National Planning Practice Guidance (Paragraph: 020 Reference ID: 18a-020-20140306). Any harm to or loss of a designated heritage asset will require clear and convincing justification which must be provided by the applicant to the Council. In decision making the Council will take into consideration the scale of the harm and the significance of the asset.
- 7.45 In accordance with the National Planning Policy Framework the Council will only permit development resulting in substantial harm to or loss to a grade II listed building, park or garden in exceptional circumstances and will only permit development resulting in substantial harm to or loss to a grade I and II* listed building, grade I and II* registered park or garden in wholly exceptional circumstances.

Conservation areas

- 7.46 In order to preserve or enhance important elements of local character, we need to recognise and understand the factors that create that character. The Council has prepared a series of conservation area statements, appraisals and management plans that assess and analyse the character and appearance of each of our conservation areas and set out how we consider they can be preserved or enhanced. We will take these into account when assessing planning applications for development in conservation areas. We will seek to manage change in a way that retains the distinctive characters of our conservation areas and will expect new development to contribute positively to this. The Council will therefore only grant planning permission for development in Camden's conservation areas that preserves or enhances the special character or appearance of the area.
- 7.47 The character of conservation areas derive from the combination of a number of factors, including scale, density, pattern of development, landscape, topography, open space, materials, architectural detailing and uses. These elements should be identified and responded to in the design of new development. Design and Access Statements should include an assessment of local context and character and set out how the development has been informed by it and responds to it.
- 7.48 Due to the largely dense urban nature of Camden, the character or appearance of our conservation areas can also be affected by development which is outside of conservation areas, but visible from within them. This includes high or bulky

buildings, which can have an impact on areas some distance away, as well as adjacent premises. The Council will therefore not permit development in locations outside conservation areas that it considers would cause harm to the character, appearance or setting of such an area.

Demolition in conservation areas

- 7.49 The Council has a general presumption in favour of retaining buildings that make a positive contribution to the character or appearance of a conservation area, whether they are listed or not, so as to preserve this character and appearance. The Council will resist the total or substantial demolition of buildings which make a positive contribution to a conservation area unless circumstances are shown that outweigh the case for retention. Applicants will be required to justify the demolition of a building that makes a positive contribution to a conservation area, having regard to the National Planning Policy Framework, Camden's conservation area statements, appraisals and management strategies and any other relevant supplementary guidance produced by the Council.
- 7.50 When considering applications for demolition, the Council will take account of group value, context and the setting of buildings, as well as their quality as individual structures and any contribution to the setting of listed buildings. Applications must clearly show which buildings or parts of buildings are to be demolished.
- 7.51 Applications for total or substantial demolition in conservation areas must demonstrate to the Council's satisfaction that effective measures will be taken during demolition and building works to ensure structural stability of retained parts and adjoining structures. Before planning permission for demolition is granted, the Council must be satisfied that there are acceptable detailed plans for the redevelopment.
- 7.52 In addition proposals for demolition and reconstruction should be justified in terms of the optimisation of resources and energy use in comparison with the existing building. Further details on this are in "Policy CC1 Climate change mitigation".

Use

- 7.53 Changes in patterns of use can also erode the character of an area. It is therefore important that, whenever possible, uses which contribute to the character of a conservation area are not displaced by redevelopment. Two uses of particular importance to the character of conservation areas are pubs and local shops, especially when they are in located in historic buildings. The Council will protect these uses as set out in "Policy C4 Public houses" and "Section 9 Town centres and shops".

Details

- 7.54 The character and appearance of a conservation area can be eroded through the loss of traditional architectural details such as historic windows and doors, characteristic rooftops, garden settings and boundary treatments. Where alterations are proposed they should be undertaken in a material of a similar appearance to the original. Traditional features should be retained or reinstated

where they have been lost, using examples on neighbouring houses and streets to inform the restoration. The Council will consider the introduction of Article 4 Directions to remove permitted development rights for the removal or alterations of traditional details where the character and appearance of a conservation area is considered to be under threat.

Landscape

- 7.55 The value of existing gardens, trees and landscape to the character of the borough is described in “Policy A2 Open space” and they make a particular contribution to conservation areas. Development will not be permitted which causes the loss of trees or garden space where this is important to the character and appearance of a conservation area.

Sustainable design and retrofitting

- 7.56 Historic buildings including those in conservation areas can be sensitively adapted to meet the needs of climate change and energy saving while preserving their special interest and ensuring their long-term survival. In assessing applications for retrofitting sustainability measures to historic buildings the Council will take into consideration the public benefits gained from the improved energy efficiency of these buildings, including reduction of fuel poverty. These considerations will be weighed up against the degree to which proposals will change the appearance of the building, taking into consideration the scale of harm to appearance and the significance of the building. Applicants are encouraged to follow the detailed advice in Camden’s Retrofitting Planning Guidance, the energy efficiency planning guidance for conservation areas and the Historic England website.

Listed buildings

- 7.57 Camden’s listed buildings and structures provide a rich and unique historic and architectural legacy. They make an important and valued contribution to the appearance of the borough and provide places to live and work in, well known visitor attractions and cherished local landmarks. We have a duty to preserve and maintain these for present and future generations.
- 7.58 The Council has a general presumption in favour of the preservation of listed buildings. Total demolition, substantial demolition and rebuilding behind the façade of a listed building will not normally be considered acceptable. The matters which will be taken into consideration in an application for the total or substantial demolition of a listed building are those set out in the National Planning Policy Framework.
- 7.59 In order to protect listed buildings, the Council will control external and internal works that affect their special architectural or historic interest. Consent is required for any alterations, including some repairs, which would affect the special interest of a listed building.
- 7.60 The setting of a listed building is of great importance and should not be harmed by unsympathetic neighbouring development. While the setting of a listed building may be limited to its immediate surroundings, it can often extend some distance from it. The value of a listed building can be greatly diminished if

unsympathetic development elsewhere harms its appearance or its harmonious relationship with its surroundings. Applicants will be expected to provide sufficient information about the proposed development and its relationship with its immediate setting, in the form of a design statement.

Access in listed buildings

- 7.61 Where listed buildings and their approaches are being altered, disabled access should be considered and incorporated. The Council will balance the requirement for access with the interests of conservation and preservation to achieve an accessible solution. We will expect design approaches to be fully informed by an audit of conservation constraints and access needs and to have considered all available options. The listed nature of a building does not preclude the development of inclusive design solutions and the Council expects sensitivity and creativity to be employed in achieving solutions that meet the needs of accessibility and conservation.

Sustainability measures in listed buildings

- 7.62 Proposals that reduce the energy consumption of listed buildings will be welcomed provided that they do not cause harm to the special architectural and historic interest of the building or group. Energy use can be reduced by means that do not harm the fabric or appearance of the building, for instance roof insulation, draught proofing, secondary glazing, more efficient boilers and heating and lighting systems and use of green energy sources. Depending on the form of the building, renewable energy technologies may also be installed, for instance solar water heating and photovoltaics.

Archaeology

- 7.63 Camden has a rich archaeological heritage which comprises of both above and below ground remains, in the form of individual finds, evidence of former settlements and standing structures. These remains are vulnerable to modern development and land use. There are currently 13 archaeological priority areas in the borough (see “Map 4: Heritage and Archaeological Sites”) although these are scheduled for review in 2017.
- 7.64 The archaeological priority areas provide a general guide to areas of archaeological remains, but do not indicate every find site in the borough. These are based on current knowledge and may be refined or altered as a result of future archaeological research or discoveries.
- 7.65 It is likely that archaeological remains will be found throughout the borough, both within and outside the archaeological priority areas. Many archaeological remains have yet to be discovered, so their extent and significance is not known. When researching the development potential of a site, developers should, in all cases, assess whether the site is known or is likely to contain archaeological remains. Where there is good reason to believe that there are remains of archaeological importance on a site, the Council will consider directing applicants to supply further details of proposed developments, including the results of archaeological desk-based assessment and field evaluation. Scheduled monument consent must be obtained before any alterations are made to scheduled ancient monuments. Camden has only one

scheduled ancient monument: Boadicea's Grave in Hampstead Heath.

- 7.66 If important archaeological remains are found, the Council will seek to resist development which adversely affects remains and to minimise the impact of development schemes by requiring either in situ preservation or a programme of excavation, recording, publication and archiving of remains. There will usually be a presumption in favour of in situ preservation of remains and, if important archaeological remains are found, measures should be adopted to allow the remains to be permanently preserved in situ. Where in situ preservation is not feasible, no development shall take place until satisfactory excavation and recording of the remains has been carried out on site and subsequent analysis, publication and archiving undertaken by an archaeological organisation approved by the Council.
- 7.67 The Council will consult with, and be guided by, Historic England and the Greater London Archaeology Advisory Service (GLAAS) on the archaeological implications of development proposals. The Greater London Historic Environment Record, maintained by Historic England, contains further information on archaeological sites in Camden. When considering schemes involving archaeological remains, the Council will also have regard to the National Planning Policy Framework.

Other heritage assets

- 7.68 In addition to conservation areas, listed buildings and archaeological remains, Camden contains 14 registered parks and gardens, as identified by Historic England. There are also 53 London squares in the borough protected by the London Squares Preservation Act 1931. The Council will encourage the management of registered parks and gardens and London squares to maintain, and where appropriate, enhance their value and protect their setting. The Council will consult with Historic England over proposals affecting these parks and gardens. We also encourage the restoration and management of registered parks and gardens and London squares to enhance their value.

Non designated heritage assets

- 7.69 The borough also has many attractive, historic, locally significant buildings and features which contribute to the distinctiveness of local areas, but which are not formally designated. The National Planning Policy Framework identifies these features as non-designated heritage assets. Non-designated heritage assets may either be identified as part of the planning process or on Camden's Local List. Camden's Local List identifies historic buildings and features that are valued by the local community and that help give Camden its distinctive identity but are not already designated in another way (for example a listed building). When planning permission is required for any proposal that directly or indirectly affects the significance of a non-designated heritage asset (either on the Local List or not) then the Council will treat the significance of that asset as a material consideration when determining the application. The Local List is available at www.camden.gov.uk/locallist.

Shopfronts

- 7.70 Shopfronts contribute greatly to the character of centres and their distinctiveness. Most of Camden's town and neighbourhood centres date back to the 19th Century and earlier, having developed from commercial activities that first took place within dwellings, although there are some significant 20th Century shopping parades.
- 7.71 Please refer to "Policy TC2 Camden's centres and other shopping areas" for policy on the design of new retail spaces.

Policy D3 Shopfronts

The Council will expect a high standard of design in new and altered shopfronts, canopies, blinds, security measures and other features.

When determining proposals for shopfront development the Council will consider:

- a. the design of the shopfront or feature, including its details and materials;
- b. the existing character, architectural and historic merit and design of the building and its shopfront;
- c. the relationship between the shopfront and the upper floors of the building and surrounding properties, including the relationship between the shopfront and any forecourt or lightwell;
- d. the general characteristics of shopfronts in the area;
- e. community safety and the contribution made by shopfronts to natural surveillance; and
- f. the degree of accessibility.

The Council will resist the removal of shop windows without a suitable replacement and will ensure that where shop, service, food, drink and entertainment uses are lost, a shop window and visual display is maintained.

Where an original shopfront of architectural or historic value survives, in whole or in substantial part, there will be a presumption in favour of its retention. Where a new shopfront forms part of a group where original shop fronts survive, its design should complement their quality and character.

Protecting existing shopfronts

- 7.72 Shopfronts form an essential part of the character and attractiveness of many areas in Camden, in particular its centres, and contribute to the creation of vibrant streets and public spaces. We will seek to protect existing shopfronts that make a significant contribution to the appearance and character of an area, for example through their architectural and historic merit. We will consider the need to keep the appearance of the shopfront, taking into account the quality of its design, its historic importance and its location. Good examples of shopfronts should be retained wherever possible.

Camden's centres and other shopping areas

9.12 The Council will ensure that development in its centres is appropriate to the character and role of the centre in which it is located and does not cause harm to neighbours, the local area, or other centres.

9.13 Camden's centres and designated shopping frontages are set out in the Local Plan Policies Map.

Protected frontages

9.14 The Council has identified key frontages within Camden's centres to which further policy and guidance apply. These protected frontages are identified as either primary or secondary frontages and are shown on the Local Plan Policies Map.

Permitted development rights

9.15 The Council seeks to protect the vitality and viability of its centres through application of the retail policies and through the control of shopping and other town centre uses on protected frontages. Under permitted development rights planning permission is not required for many changes of use between retail and other town centre uses, meaning the Council cannot apply our planning policies for town centres in these instances.

9.16 The government has introduced a number of new permitted development rights that affect town centres. These include the new rights to:

- change from A1 retail or A2 financial services to A3 restaurants and cafes (subject to prior approval);
- change from A1 retail to A2 financial services; and
- change from A1 retail or A2 financial services to D2 assembly and leisure uses (subject to prior approval).

9.17 The above permitted development rights that are subject to prior approval from the Council are subject to the change of use not having unacceptable effects on noise, odour, waste, transport and highways and if located in a key shopping area the sustainability of that shopping area.

Policy TC2 Camden's centres and other shopping areas

The Council will promote successful and vibrant centres throughout the borough to serve the needs of residents, workers and visitors.

We will:

- a. seek to protect and enhance the role and unique character of each of Camden's centres, ensuring that new development is of an appropriate scale and character for the centre in which it is located;
- b. provide for and maintain, a range of shops including independent shops, services, food, drink and entertainment and other suitable uses to provide variety, vibrancy and choice;
- c. make sure that food, drink, entertainment and other town centre uses do not have a harmful impact on residents and the local area and focusing such uses in King's Cross and Euston Growth areas, Central London Frontages, and Town Centres (Refer to "Policy TC4 Town centres uses");
- d. support and protect Camden's Neighbourhood Centres, markets and areas of specialist shopping, local shops; and
- e. pursue the individual planning objectives for each centre, as set out in supplementary planning document Camden Planning Guidance on town centres, retail and employment, and through the delivery of environmental, design, transport and public safety measures.

The Council has designated primary and secondary frontages in its centres, which are shown on the Local Plan Policies Map. We will:

- f. protect the primary frontages as locations with a high proportion of shops (A1) in order to maintain the retail function of the centre; and
- g. protect the secondary frontages as locations for shops (A1) together with a broader range of other town centre uses to create centres with a range of shops, services, and food, drink and entertainment uses which support the viability and vitality of the centre.

The Council's expectations for the mix and balance of uses within frontages for each designated centre are set out in Appendix 4.

Housing above and below shops

The Council supports the development of housing within centres and Central London including above and below shops where this does not prejudice the town centre function and particularly the ability of the ground floor to be used for town centre uses.

Housing in protected frontages

In order to protect the retail and town centre function of our centres the Council will only permit conversion of retail and other town centre uses to residential use on the protected frontages where it does not harm the role and character of the centre, including maintaining the supply of shop premises in centres across the borough.

Neighbourhood Centres

The Council will seek to retain convenience shopping for local residents in Camden's Neighbourhood Centres and will ensure that development in them does not harm the function, character or success of that centre.

Design of new retail spaces

New retail spaces should be of high quality, provide generous storey heights and incorporate room for signage.

Protecting and enhancing the role and character of Camden's centres

- 9.18 The Council will protect and enhance the role and character of each of Camden's centres by assessing proposals against this policy and the centre specific guidance set out in Appendix 4 and the supplementary planning document Camden Planning Guidance on town centres, retail and employment. Appendix 4 sets out the mix of uses that the Council expects on primary and secondary frontages, including:
- the minimum proportions of shops (A1 use); and
 - the maximum proportions of food, drink and entertainment uses (A3, A4, A5 uses).

Housing above and below shops

- 9.19 The Council supports development of housing within centres where they do not cause harm to the vitality and viability of these centres, for example by limiting the use of the premises at the ground floor for retail or other town centre uses. In accordance with "Policy A4 Noise and vibration" the Council will not permit development of housing in locations with high levels of noise unless appropriate attenuation measures are provided. With regard to housing at basement or lower ground floor level, habitable rooms will not be permitted in areas at risk of flooding (refer to "Policy A5 Basements"). The Council will also take into consideration the centre specific objectives set out in Camden Planning Guidance.

Housing in protected frontages

- 9.20 Due to high demand for housing and high housing prices in Camden shop units across the borough and particularly those in the Neighbourhood Centres face pressure for conversion to residential use. Shop premises that are converted to homes are likely to stay in residential use even if local market forces swing back in favour of retail uses, whereas changes of use between town centre uses are more flexible over the longer term. The Camden Retail Study anticipates demand for additional retail floorspace in designated centres throughout the Plan period. Camden seeks to protect the role and character of the designated centres. The most significant way we can protect the function of centres is by ensuring that sufficient ground floor premises remain in retail or other town centre uses.

Neighbourhood Centres

- 9.21 Camden has 37 neighbourhood centres which cater for the day to day shopping and service needs of their local populations. The neighbourhood centres are spread across the borough and vary in size and in role. They contain a range of uses including shops, food and drink uses, doctor and dentist surgeries and financial and professional services and often have housing on upper floors. Housing is the Council's preferred use above ground floor level in neighbourhood centres and we will promote the residential use of vacant or underused floors.
- 9.22 Commercial and community uses are considered acceptable uses of upper floors provided they do not cause harm to the amenity of existing residents or introduce activity that would prejudice future residential use on other levels or in neighbouring properties.
- 9.23 The Council will seek to retain a strong element of convenience shopping for local residents in Camden's neighbourhood centres and ensure that any development in them does not harm the function, character or success of that centre. We will take into account the individual character of the centre when assessing development proposals but, as a guide, we will resist schemes that would result in less than half of ground floor premises in a neighbourhood centre from being in retail use or in more than three consecutive premises being in non-retail use. We will also take into account any history of vacancy in shop units and the prospect of achieving an alternative occupier for vacant premises. Applications for food, drink and entertainment uses will be carefully assessed to minimise the impact on local residents and the local area.

Design of new retail spaces

- 9.24 All units for retail and other town centre uses on protected frontages in Camden's centres and shopping areas should be designed to provide high quality retail space. In particular shop units should provide generous storey heights and space for signage. For most locations the Council will expect a minimum storey height of approximately 4.5m, which provides approximately 3.5m clear internal height. In some key shopping areas even higher storey heights may be necessary to provide spaces that are suitable for larger shops. Such locations include the Central London Frontages and in particular the primary frontages. In these locations the Council may require storey heights of 6m, providing approximately 5m clear internal height.

Town centre uses

- 9.28 This section of the plan sets out the Council's policies on the mix and balance of uses with Camden's centres.

Food drink and entertainment uses

- 9.29 Camden's image as a dynamic and attractive place is in part due to the number and quality of restaurants, bars and entertainment venues in the borough, with Camden Town and Covent Garden having particular concentrations of such premises. These areas play an important part in the night time economy of Camden and of London, socially, economically and in terms of job provision. Covent Garden, for example, is identified in the London Plan as part of a strategic cultural area. However, night time activity can also lead to problems such as antisocial behaviour, crime and fear of crime, noise, congestion and disturbance.
- 9.30 Conflicts can arise as, due to the borough's densely developed, mixed use nature, much night-time activity occurs close to places where people live. In addition, large numbers of such uses can change the character of the area in which they are located and reduce its range of shops or the quality of the shopping environment. Conflicts can be made worse where a particular location becomes a focus for late night activity.
- 9.31 Eating, drinking and other leisure uses provide a key role in the attractiveness of Camden's centres. However, food, drink and entertainment uses can affect the overall viability and vitality of a centre by eroding the retail offer and can have an impact on amenity through noise and other impacts. In order to protect the primarily retail role of core frontages, the preferred location of food, drink and entertainment uses is secondary frontages.

Other town centre uses

- 9.32 Town centre uses include:
- shops and markets (use class A1);
 - financial and professional services (A2);
 - cafes and restaurants (A3);
 - drinking establishments (A4);
 - hot food takeaways (A5);
 - offices (B1a);
 - hotels (C1);
 - community uses (D1), including neighbourhood police facilities;
 - leisure uses (D2);
 - theatres (sui generis);
 - betting shops (sui generis);
 - a number of other uses not in any use class (see Other town centre uses below).
- 9.33 Main town centre uses: Retail development (including warehouse clubs and factory outlet centres); leisure, entertainment facilities the more intensive sport and recreation uses (including cinemas, restaurants, drive-through restaurants, bars and pubs, night-clubs, casinos, health and fitness centres, indoor bowling

centres and bingo halls); offices; and arts, culture and tourism development (including theatres, museums, galleries and concert halls, hotels and conference facilities).

- 9.34 This policy will be applied to proposals for these uses, whether located inside or outside of a centre.

Policy TC4 Town centres uses

The Council will ensure that the development of shopping, services, food, drink, entertainment and other town centre uses does not cause harm to the character, function, vitality and viability of a centre, the local area or the amenity of neighbours.

We will consider:

- a. the effect of development on shopping provision and the character of the centre in which it is located;
- b. the cumulative impact of food, drink and entertainment uses, taking into account the number and distribution of existing uses and non-implemented planning permissions and any record of harm caused by such uses;
- c. the Council's expectations for the mix and balance of uses within frontages for each centre are set out in Appendix 4;
- d. the individual planning objectives for each centre, as set out in the supplementary planning document Camden Planning Guidance on town centres, retail and employment;
- e. impacts on small and independent shops and impacts on markets;
- f. the health impacts of development;
- g. the impact of the development on nearby residential uses and amenity and any prejudice to future residential development;
- h. parking, stopping and servicing and the effect of the development on ease of movement on the footpath;
- i. noise and vibration generated either inside or outside of the site;
- j. fumes likely to be generated and the potential for effective and unobtrusive ventilation; and
- k. the potential for crime and antisocial behaviour, including littering.

To manage potential harm to amenity or the local area, we will, in appropriate cases, use planning conditions and obligations to address the following issues:

- l. hours of operation;
- m. noise/vibration, fumes and the siting of plant and machinery;
- n. the storage and disposal of refuse and customer litter;
- o. tables and chairs outside of premises;
- p. community safety;
- q. the expansion of the customer area into ancillary areas such as basements;
- r. the ability to change the use of premises from one food and drink use or one entertainment use to another (within Use Classes A3, A4, A5 and D2); and

- s. the use of local management agreements to ensure that the vicinity of premises are managed responsibly to minimise impact on the surrounding area.

Contributions to schemes to manage the off-site effects of a development, including for town centre management, will be sought in appropriate cases.

- 9.35 New shops, services, food, drink and entertainment uses can add to the vitality and vibrancy of Camden's centres and local areas. However, they can also have other impacts such as diverting trade and displacing existing town centre functions. As a result, the Council will seek to guide such uses to locations where their impact can be minimised. When assessing proposals for these uses, the Council will seek to protect the character and function of our centres. The Council will prevent any reduction in vitality and viability of the centres by requiring sequential assessments and impact assessments where appropriate (in accordance with the National Planning Policy Framework) and through implementing this policy.
- 9.36 The Council will not grant planning permission for development that it considers would cause harm to the character, amenity, function, vitality and viability of a centre or local area. We consider that harm is caused when an impact is at an unacceptable level, in terms of:
- trade and turnover;
 - vitality and viability;
 - the character, quality and attractiveness of a centre;
 - levels of vacancy;
 - crime and antisocial behaviour;
 - the range of services provided; and
 - a centre's character and role in the social and economic life of the local community.
- 9.37 We will consider the cumulative impact of additional shopping floorspace (whether in a centre or not) on the viability of other centres and the cumulative impact of non-shopping uses on the character of the area. The Council will consider cross boundary impacts of shopping provision, both how provision in Camden affects neighbouring boroughs and how provision in neighbouring boroughs affects Camden.
- 9.38 The supplementary planning document Camden Planning Guidance on town centres, retail and employment provides detailed guidance on how we will treat planning applications for shops, food, drink and entertainment uses in particular centres, taking into account their specific circumstances. Camden Planning Guidance on town centres, retail and employment also provides information on when we consider that concentrations of food, drink and entertainment uses, and reductions in the proportion of premises in retail use, would be likely to cause harm to the character, function, vitality and viability of a centre. We will take these and any other relevant supplementary guidance into account when we assess applications in these locations. We will also take into account any history of vacancy in shop units and the prospect of achieving an alternative occupier for vacant premises when considering proposals that involve the loss of retail premises.

Food, drink and entertainment uses

- 9.39 Within each of Camden's centres, the Council will seek to prevent concentrations of uses that would harm an area's attractiveness to shoppers or its residential amenity. The Council wishes to see a wide range of entertainment uses within its centres, not just those that primarily involve drinking and will encourage suitable uses that contribute towards this.
- 9.40 Where food, drink and entertainment uses are permitted, they will need to be managed to protect the amenity of residents. To ensure such uses do not harm amenity or the character of an area, either individually or cumulatively, we will consider applying controls on:
- hours of operation;
 - refuse and litter;
 - noise/vibration;
 - fumes;
 - customer area;
 - local management issues; and
 - changes of use.
- 9.41 Where appropriate, we will use planning conditions or obligations to ensure that any remaining impact is controlled. "Policy A1 Managing the impact of development" sets out further measures to manage the impact of development on amenity.
- 9.42 The Council will seek to ensure that community safety issues associated with proposals are fully addressed. As well as appropriate design measures, the Council will seek financial contributions towards management arrangements, including street wardens, CCTV, town centre management and other community safety schemes through the use of planning conditions and obligations, where appropriate. Camden's Statement of Licensing Policy sets out the Council's approach to licensing and the expectations that the Council and the Metropolitan Police have for those involved in licensed activities.
- 9.43 The supplementary planning document Camden Planning Guidance on town centres, retail and employment provides further advice on the impact of food, drink and entertainment uses and provides detailed guidance on how we will consider applications for such uses in each centre.

Other town centre uses

- 9.44 A number of uses commonly found in centres (and smaller shopping parades) are not included in the A1, A2, A3, A4, A5, B1a, D1 or D2 Use Classes. These include amusement arcades, launderettes, saunas and massage parlours, car showrooms and minicab offices. While centres are generally the most appropriate location for these uses, the Council will carefully consider their potential impact when assessing planning applications to make sure that they do not harm the centre or the amenity of neighbours.
- 9.45 Particular issues that may arise include emissions and noise (e.g. from launderettes), highway and traffic problems (e.g. from minicab offices and car showrooms) and community safety and the fear of crime (e.g. from amusement arcades, betting shops, massage parlours and saunas, particularly where there are concentrations of such uses). Amusement arcades, massage parlours and

saunas are unlikely to be considered acceptable in the busiest parts of centres or near to housing, schools, places of worship, hospitals or hotels.

Health impacts

- 9.46 In line with the National Planning Policy Framework the Council believes that the planning system can play an important role in facilitating healthy communities. One issue of particular importance in the borough is childhood obesity. The Council seeks to tackle this issue and encourage healthy eating habits. The Council is undertaking a range of programmes aimed at improving the food environment in the borough. While the causes of obesity are complex there is evidence to support that energy dense fast food is one of a number of contributing factors to obesity. The Council will therefore consider the health impacts of the development of new hot food take aways in the borough.

Betting shops, payday loan stores and pawnbrokers

- 9.47 The number of betting shops, payday loan stores and pawnbrokers has increased in Camden. The Council considers that a proliferation of these uses could damage the character, vitality and viability of town centres. The Council will therefore monitor the number and impact of betting shops, payday loan stores, and pawnbrokers over the plan period and consider whether evidence shows there is a need to introduce limits on such uses in the future.
