I object to this application.

The developer has tried to overdevelop in at least one other north London borough and has ignored community concerns. Maybe talking with planning in Haringey and Islington would be a good idea as this is a major development considering its impact on Hampstead Heath, not just a few extra houses.

Millfield Lane is very special and well loved and overdevelopment of this sort cannot be allowed.

I am also concerned for the serious risk for unintentional pollution and contamination in the swimming ponds nearby, one of which is within a very short distance. These ponds are of international importance and reputation.
