Dear Ann-Marie,

Re: Agar Grove, phase 1B Passivhaus Certification

We are contracted by the Passivhaus Institut, Germany to provide certification to the Passivhaus standard. We have been employed by the London Borough of Camden to assess the buildings against the Passivhaus Classic standard.

We have undertaken detailed checks on the design and can confirm it is possible for the buildings to meet the standard. However, the final certification will only be provided once all evidence is received and confirmed as acceptable, this will not be possible until the buildings are completed and commissioned.

Yours sincerely,

Sally Godber
Director
